

THREE OLD RELICS FILED WITH IRELAND

Donation Patents Uncarried and Recorded

ONE GRANTED BY PRES. BUCHANAN

Grants Given Old Pioneers in the Early Days

Three old donation land law patents were filed this week, in the county recorder's office. They were printed on the old fashioned sheepskin parchment, and were issued as follows: David M. Walters, Washington county, Oregon, for 160 acres. The patent bears the signature of James Buchanan, and was issued on January 18, 1859. The second one is to Edward Barton and wife, of this county, and was signed by President Andrew Johnson. The third document was issued to William E. Walker, of Washington county, and described a tract of land containing 318 acres, with date of issue 1869. The patent bears the signature of President U. S. Grant. These patents have lain in the family strong box for a good many years, and it seems singular that they were never recorded. The Walters patent was executed when Oregon was still a territory—49 years ago.

REHSE-McCLARKIN

A very pretty home wedding took place at the home of Mr. and Mrs. J. R. McClarkin, Laurel, Oregon, Wednesday noon, Nov. 18, 1908, when their eldest daughter, Maud Estella, was united in marriage to Mr. Herman H. Rehse, of Farmington. Rev. J. A. Campbell officiating. The wedding march was played by Miss Vera Rehse, sister of the groom. At exactly 12 o'clock, the happy couple took their places under a canopy of Oregon Grapes, from which was suspended a large wedding bell.

The bride wore a beautiful gown of light blue muslin veiling, trimmed in Valenciennes lace and silk, and carried a shower bouquet of ferns and white carnations.

SAWING TIMBERS FOR THEIR BIG TUNNEL

Bridge No. 15 will be Finished this Week

TEAMS LAID OFF FOR THE WINTER

Carpenters will Soon Begin Timber No. One Tunnel

Construction trains are running to a point three miles beyond Buxton on the P. R. & N. Superintendent Wetzell, who has a sub-contract from the Portland Bridge Company, will finish bridge No. 15 by the end of the present week. He will then begin work on bridge No. 16, which is 1 mile further west. All the teams have been laid off, except those engaged in hauling lumber for the bridges. Contractor McCabe has a sawmill in operation at the big tunnel, which is kept busy sawing timbers for the tunnel. The work of placing the timbers in the big 1400 foot tunnel will soon begin, and it is quite likely that this labor will not be finished before the end of the winter.

The construction train is taking considerable steel to the front, to be used on the new track. A large lot of bridge timbers are also being sent forward from Buxton. The labor of clearing right of way, along the line of survey last selected by the company, is rapidly going forward. As stated last week, camps are established beyond Buxton toward the coast, and men will be kept at work all winter.

UNITED RAILWAYS FILES WATER RIGHT

Takes all of East Dairy Creek From Denny Bridge Down

WANTS IT FOR LIGHT AND POWER

Right Ends With Creek Two Miles West of Hillsboro

On Monday, W. R. Benham, of Portland, President of the United Railways Company, recorded a map in this county, describing a water right which takes in all of East Dairy Creek from the Denny bridge in Section 21, Township 3 north, Range 3 west of the Willamette Meridian, to a point where McKay Creek and East Dairy Creek are joined in Section 28, Township 1 north, Range 3 west. This brings the termination of the water right to a point within two miles west of Hillsboro. The document states that the water is appropriated "for irrigation and domestic purposes, and for manufacturing, and furnish electric energy for light, heat and power, and for other purposes," taking in all of "the flood and winter flow of East Dairy Creek, said appropriation being in volume a continuous flow of 50 cubic feet per second, through over and past a certain point in said stream in Section 21, Township 3 north, Range 3 west of the Will. Mer." The water will be diverted at a point where the main dam and head gate of said water conduits are to be located, on the north bank of said East Dairy Creek, at or near the Denny bridge, where the country road crosses said creek. From said point, the general course of the canal will be along the east side of the stream in a southerly direction. The size of the canal will be 6 feet wide at the bottom and 4 feet deep, the right ending at a point in Section 28, Township 1 north, Range 3 west, where McKay and East Dairy creeks are joined, which is about 2 miles west of Hillsboro.

The filing of the above rights indicates that the United Railways Company is figuring on a big water and light plant, near Hillsboro. Dairy Creek, from the point of appropriation, has a considerable fall to the point where the right ends, and which will be amply sufficient for the purposes for which the right is filed.
