## MONDAY'S GAME THE BEST OF THE YEAR

### Cardinals Again Beat the Reinforced Colts

#### VERY INTERESTING FULL OF INTEREST

#### Colts Seated Win out by a Nose in Ninth

Monday's game at Athletic Park will go down in history as the best played on the grounds in Washington County, in the year 1909. The Colts came down from Forest Grove with a team that could play league ball, and the Cardinals, playing the same game for two men, certainly earned the hearts of the local fans by the city ball put up to the visitors.

The Cardinals scored in the first and ninth innings, while the Colts were blanked until the eighth, when they ran one over the plate and tied the score. The decisive tally came in the ninth inning, and the runner scored on a slide,atcher McBride, who received the ball from second base, being a second slow in getting the ball on the spot. It was a game such as one rarely sees outside of league work, and Portland league players have never put up better ball, at any time. The session was tense and ran with a weak heart had no business on the grounds. John Baker umpired, and there were some close decisions. There was some disposition to kick at the last decision, but McBride, the Colts' pitcher, it is said, admitted the Cardinals was safe, but that it was a game to kick and get another inning, if possible. Umpire Book, however, says it was not close enough for a doubt.

A gentleman who knows the circumstance was relating the other day, how a man would make good in the West if he kept his shoulder to the wheel. To emphasize his statement he said "There is Brice Wilson, of Timber, who came here a few years ago, and settled on a piece of timber land above Timber. He commenced making decoy ducks and gradually accumulated a few dollars by their sale. He put all his surplus earnings, which were very small, into timber lands that he could acquire cheaply, and today he could sell out for practically \$100,000." What do you think of that?

Rev. Evan P. Hughes, a number of years pastor at the Cong. Church in this city, now occupying the pulpit at Corvallis, was in the city Tuesday morning, enroute to Portland. Mr. Hughes thinks that Hillsboro is making very rapid progress from a commercial and building standpoint, and predicts a great future for the county seat. He says that Corvallis is awakening from a Rip Van Winkle sleep, and is beginning to take advantage of its possibilities. Nearly a half million is being expended there for the benefit of the Agricultural College.

Fred Schomburg is every week receiving letters from people who read his annual statement of his dairy herd, which was published in the Argus a few months ago. The article was published in many stock and dairy papers, and has done a world of good for Washington County. If farmers and dairymen who have good showing on their herds would publish what they have accomplished in a year it would prove a booster club worth while.

J. L. Robinson, of Farmington, was in town Monday, and remembered the Argus force with a box of fine apples, and which are equal to any of the variety raised anywhere. The fruit was free from worm or scale, and it is certainly an exemplar of what can be accomplished with a little care.

Joseph Spencer Adams, for many years a resident of this city, and who was in the brick manufacturing business here in the eighties and early nineties, committed suicide in the State Hospital for the Insane at Salem, last Thursday morning, about three o'clock, by twisting a curtain into a rope and hanging himself to the gas rod overhead. He was committed to the Hospital May 3, from Multnomah County, after a vain endeavor to regain his falling health in a Portland sanitarium. He was married to Martha Gooney, about 1880, the wife being a daughter of L. M. Gooney, one of Hillsboro's pioneer carpenters and builders. The wife and three children, of Portland, survive: Vernie, aged 28; Thomas, aged 19; and Lester, aged 8 years. Deceased was an Odd Fellow, and was affiliated with Montezuma Lodge, of this city.

### Did You ever Stop to Think

that the balance wheel in your watch makes 300 moves a minute, 18,000 per hour, or 432,000 from the time you wind it until you wind it again.

You oil your windmill or wagon, your wife her sewing machine, almost daily. Still you let your watch run in old rancid oil and accumulated dust year after year, or until it stops. Then when it is worn and the delicate bearings are cut out, blame the jeweler, because your watch kept good time for ten years until you let him clean it.

An ordinary watch, cleaned yearly, will last any man a lifetime.

My seventeen years' experience at watch work, is at your service. It will cost you nothing to let me examine your watch. All Work Guaranteed.
