The horticultural and agricultur-al exhibit at the Fair is as fine as the world could produce in any section or any clime. The displays of all kinds are much better than The horticultural and agriculturlast year, and it is indeed a revelation to see what Washington Coun-an order of said Court should not be made authorizing F. D. Vincent, adminty can produce in the way of fruits and vegetables. The collection was made without any planning afore time and this makes it more valuable as indicative of what we can do. The farmers and fruit growers who have brought in this splendid earnest of the soil are to be com mended for their public spirit, for

foir look at that exhibit oppositthe postoffice they should feel them selves shrink to a shrivel. If some of these dear specimens who are al ways "hollering their heads off" at some one else who is generally at tending to his own business-would devote their time to seeing thingas they are it would be better for all-themselves included.
