LOTS OF MILK FEVER

Farmers and dairymen report a great deal of milk fever this Spring, and several have lost cowe as a retain remedy, and Dr. Reigan the other day saved a cow for H D. Schmeltzer, which had been given up. H. D had even bargained for a sled to baul the animal away, and had killed the calf. The air treatment was given after the cow was given a hypodermic, and in a few hours she was on her f et, and is now doing nicely. Fre ! Schomburg had a cow so sfil cted, some time back, and sent in for Reagan. After Reagan had left town with his rig, Fred telephoned in that the cow was dead and for him not to come. As the message was not received, S. M. reached the ranch, used his hypo, forced in the sir, and her cowship was soon at her old bu-iness of supplying milk for the condenser.
