#### SAVING TIME by TELEPHONE

When a man feels the necessity of being in two places at the same time, he goes to the nearest telephone and sends his voice.

It is not exactly the same thing, but when a man talks hundreds of miles in opposite directions from the same Bell Telephone, it is about as good.

In the daily use of the telephone a man travels all over town by wire in a few minutes. It is just as easy to travel all over the state and other states by means of the universal Long Distance Bell System.

The Pacific Telephone and Telegraph Co.

Every Bell Telephone is the center of the system
