"This is the time of year,"  
 said an old and successful dairy-  
 man, to the Argus, the other  
 day, "that the dairyman and  
 farmer should not lose sight of  
 the fact that stock must be well-  
 fed. You would not think of  
 cutting rations short on the cow  
 that is producing milk—and the  
 yearling heifer that will be the  
 future cow must not be forgot-  
 ten. Now is the time to give her  
 ample nourishment, so that when  
 she becomes a milk producer she  
 will have the udder. You can't  
 starve the heifer and expect her  
 to make a good producer when  
 she matures." He also stated  
 that the young stock of the  
 dairymen always mark his suc-  
 cess or failure. Poor young  
 stock generally mean poor cows.
