The purpose of the council is to get a decent street through to the condenser for the travel that comes both ways hauling to the con-denser and for the traffic that comes in from south of the river. As to Baseline, there appears to be no general objection to the improvement, as it is needed to connect the town with the main road leading west to Cornelius and Forest Grove. It is co tended by those fighting the improvement on First that Se should be connected with First as far south as possible, thus giving a hard surface road to the condenser, and eliminating sev-eral blocks of improvement at this time.
