

ATTENTION DAIRYMEN!

Indications are that the milk market for the year of 1916 will be considerable better than for the past year, a prospect that is very pleasant for the dairyman.

With an assured market for his product the next most important point for the dairyman to consider is the question of feed. **IT IS OUR AIM TO SELL GOOD FEEDS AT REASONABLE PRICES AT ALL TIMES.** The trend of the feed market is towards higher prices and we think it advisable to lay in at least a part of your Winter's requirements now. For a short time we will sell the leading feeds at the following prices:

BRAN	\$22.50 per ton	SHORTS	\$23.50 per ton
Dried Beet Pulp	22.50	Shady Brook Dairy Feed	23.50
Linseed Oil Meal	36.00	Soya Bean Oil Meal	35.00

In addition to the above we have a full line of all dependable feeds for stock and make a specialty of **POULTRY FEEDS** such as shell, grit, bone, scratch feed, egg mash etc. We are still selling the high patent **BEAVER STATE FLOUR** at \$1.30 per sack. We will take **POTATOES, GRAIN** or **HAY** in exchange for feed or will pay cash for same.

Three Warehouses **C. B. BUCHANAN & COMPANY** Hillsboro Cornelius North Plains

A New Machine At The Hillsboro National Bank

This machine is really a wonderful set of steel brains which we are putting to work in our accounting department.

With it we can handle our figure work faster than ever before and at the same time be sure that every item in our books is right.

Helps Give You Better Service

By the machine method, every depositor's account is kept in balance all the time and there are no mistakes such as are unavoidable with other ways of handling figures.

The time saving made possible by the machine gives us an opportunity to improve the service to our customers in all departments of the bank.

Everything Done Automatically

It prints dates, adds your deposits to the old balance, subtracts checks, figures and prints your new balance. All of this is done automatically. The operator simply writes the amounts on the keyboard—the machine shifts from column to column and adds, subtracts, or prints the date as desired, without the least attention being necessary.

Come In And See It Work

There is no method of posting ledgers known which equals this Burroughs Bookkeeping Machine in either accuracy or time saving.

Come in and see our new Burroughs at work in our accounting department.

W. H. Wehrung, President.

Story of a Fortune.
Peter Tbelussen, a London merchant, died in 1787, leaving a fortune of £700,000. By his will £100,000 went to his wife and children. The rest of his fortune was committed to trustees, with the stipulation that it should be allowed to accumulate during the lives of the sons and grandsons. When they were all dead the fortune was to go to the oldest living great-grandson, or if there should be no great-grandson it should go to the government and be applied on the national debt. The will was contested, but the heirs were unable to break it. The last grandson died in 1850, and the fortune was delivered to Charles Tbelussen, the oldest living great-grandson. At the time the will was made experts figured out that the fortune would amount to something like £1,500,000 by the time it should be turned over to the great-grandson, but the expenses of litigation and administration had been so great that he received only about the amount of the original fortune, £700,000.

How Cotton Varies.
Cotton is usually differentiated in ordinary classification by the length of its staple. "Ordinary cotton" in the United States is of several kinds, chief among them the upland cotton, with a staple of from seven-eighths to one inch in length, and gulf of Texas cotton, of which the staple is not usually quite so long. The longest stapled cottons among the "ordinary cottons" here are the bottom land or bender cotton, with a staple of from one and one-eighth to one and one-fourth inch, and the special fancy staple cotton, one and three-eighths to one and five-eighths inch in length. The sea island cotton, which is grown on the sea islands off the coast of South Carolina, has a staple of from one and a half to two and a half inches, the average length being one and three-fourths. Egyptian cotton is being grown in southern California, New Mexico and Arizona. Its staple is not so long as the sea island cotton, but compares rather with the upland cotton here.

Japanese Houses.
A number of causes have affected the size of the Japanese house, which seems much too small for a comfortable habitation in the eyes of the foreigner. In the first place, the people themselves are small, the average height of the Japanese male adult being five feet three and one-half inches and that of the female four feet nine and one-half inches. As it is the usual custom to sit on the floors upon cushions, with the legs bent beneath, great height of ceilings is not desirable. The low ceilings may also be attributed to the lack of any heating systems other than the small charcoal brazier known as the "hibachi." The frequency of earthquakes throughout Japan has been a largely contributing cause as well, and the question of expense in a country where economy reigns supreme has also had a powerful influence.

You've hit the right tobacco

when you fire-up some Prince Albert in your old jimmy pipe or in a makin's cigarette. *And you know it!* Can't get in wrong with P. A. for it is made *right*; made to spread-smoke-sunshine among men who have suffered with scorched tongues and parched throats! The patented process fixes that—and cuts out bite and parch. All day long you'll sing how glad you are you're pals with

It's an easy job to change the shape and color of unstable brands to imitate the Prince Albert tily red tin, but it is impossible to imitate the flavor of Prince Albert tobacco. The patented process protects that!

PRINCE ALBERT

the national joy smoke

You take this testimony straight from the shoulder, men. You can smoke a barrel of P. A. without a kick! It hands out all the tobacco happiness any man ever dreamed about, it's so smooth and friendly. It's a mighty cheerful thing to be on talking-terms with your pipe and your tongue *at the same time*—but that's what's coming to you sure as you pin your faith to Prince Albert!

R. J. REYNOLDS TOBACCO CO., Winston-Salem, N. C.

THE OREGON NURSERY CO.

At Orenco, Oregon, now has an experienced and practical landscape man connected with its large Nursery. Any one desiring to improve his home-grounds by the planting of trees, shrubbery, etc., will find it convenient and helpful to get his advice and suggestions on any plantings contemplated. This is entirely free.

Those who have ever stopped

off at Orenco and gone over their large acreage of ornamental nursery stock, need not be told that it is the largest and most complete on the Coast. If you have not seen it you should arrange to do so at your earliest convenience. If you are contemplating the planting of any ornamental stock, you should endeavor to see it this Fall—so that it may get the benefit of our Fall and Winter rains:
