You've hit the right tobacco

when you fire-up some Prince Albert in your old jimmy pipe or in a makin's cigarette. And you know it! Can't get in wrong with P. A. for it is made right; made to spread-smoke-sunshine among men who have suffered with scorched tongues and parched throats! The patented process fixes that-and cuts out bite and parch. All day long you'll sing how glad you are you're pals with

the national joy smoke

You take this testimony straight from the shoulder, men. You can smoke a barrel of P. A. without a kick! It hands out all the tobacco happiness any man ever dreamed about, it's so smooth and friendly. It's a mighty cheerful thing to be on talking-terms with your pipe and your tongue at the same time-but that's what's coming to you sure as you pin your faith to Prince Albert!

Po you know what was the thrilling wedding day in the histor of the world? There have been man services that had to be deferred because of the opposition of parent or rival, but all of them pale into dingy winter of 923, when Candino II., the noble doge, was lending his presence to the biggest wedding party in the history of the Church of San Pietro. It had long been the custom for all the brides to be married on St. Mary's day. It was, moreover, the custom for the brides to bring with them all their fewels and their downies. GET RICH QUICK SCHEMES.

For Big Investors They May Work, but Not For Small Once.

Those who labor hard for their money and who have a still more ardu ous struggle in saving small sums," says a banker in the American Mage zine, "naturally fall easy victims in many instances to the desire for sudden riches. But the fatal error lies in supposing that the person of small means can afford to take the chance. if he or she loses they lose all. The large capitalist and the professional money lender have the law of averages working with them. They can afford to sink money into twenty ventures if they make a thousand per cent on one. They are protected by the law of chance, the average safety of their investments depending upon no single

ness, but should be borne by the strong, never by the weak. The promoter who talks about the small investor being given the same opportunities as the very rich is indulging in 'bunk.' He always forgets to any that a safe & per cent bond or a 6 per cent mort-gage, 'cold, impersonal depositories for funds, will at the end of five years 35 per cent (allowing for compound interest) and that the vast majority of new ventures with big promises will have paid nothing.

Disraell and the Editor. Disraeli would dearly have liked to suspend the London Globe years ago

when that paper, then a Whig organ, fell foul of him over his "Vindication of the English Constitution." Few editors have ever been so roughly abused as in Disraell's letter to the Times: "It is not my passion for notoriety that has induced me to tweak the editor of the Globe by the nose and to inflict sundry kicks upon the baser part of his base body, to make him eat dirt and his own words, fouler than any filth, but because I wished to show to the world what a miserable poltroon, what a craven dullard, what a literary scarecrow, what a mere thing, stuffed with straw and rubbish, is the soldieant director of public opinion and official organ of Whig politics."-London Opin

Kick of the Gun. When a young American joins the national guard or, following that instinct which not even long city life can entirely kill, takes a gen and starts out as a hunter, one of the earliest surprises he gets is that nasty hard kick his firearm gives him.
