

Why Prince Albert meets men's tastes all over the world!

The patented process makes Prince Albert so good in a pipe or rolled into a cigarette that its popularity is now universal! It satisfies all smoke desires! This patented process, which also removes bite and parch, is controlled by us. No other tobacco can be like

PRINCE ALBERT
the national joy smoke

Listen: Men who have stowed away gentle old jimmy pipes for years, have brought them back to the tune of Prince Albert! Get yours out, for your confidence never will be abused! We tell you Prince Albert will set pipe free the tenderest tongue!

And smoked in a makin's cigarette, Prince Albert is so refreshing and delightful that it gives you a new idea of cigarette happiness. Any way you fire-up Prince Albert, it will win you quick as a flash—it's so good and so friendly!

R. J. REYNOLDS TOBACCO CO., Winston-Salem, N. C.

BULLETS IN FLIGHT
Even the Best Aimed Ones Never Follow Their Noses.
STRIKE A WEE BIT SIDWAYS.

The Projectile Travels on a Curve, of Course, and it Keeps its Axis Always in the Direction the Axis Had When the Ball Left the Gun.

It is a well known fact that a bullet never goes straight to a mark, but flies in a curve on the order of the parabola. But most people think that the bullet itself follows its nose and that at first (when the nose is pointed up) the bullet follows it and that when the bullet is coming down on the other leg of the curve the nose is pointed down.

This is a mistake, for the nose of a bullet always maintains its own direction, no matter what the bullet as a whole tries to do. That is, if a gun be pointed slightly up, the bullet, when it strikes the target, will not enter it perpendicularly by the nose, and the hole made will be larger than the bullet is round, for the bullet of necessity must hit in a certain degree flatwise. Of course the reason the bullet does this is because it has a very rapid rotation given it by the rifles in the barrel, which keeps it also from turning over and over in the air.

Another thing that will seem peculiar to most people is the action of gravity on a bullet. If a gun be fired exactly horizontally the bullet will have to be pulled down by gravity exactly sixteen feet during the first second. So if there were no sights on a gun and it was leveled by means of a hand level and fired the bullet would hit something exactly sixteen feet below the gun at a distance away equal to the velocity of the bullet per second.

No matter what the bullet's velocity, gravity will pull it down sixteen feet during the first second, or if the bullet be fired upward gravity will take from its upward velocity thirty-two feet during the first second.

The bullet itself keeps its axis always in the direction the axis had when the bullet issued from the gun. This is the well known gyroscopic principle made use of in the gyroscopic compass and the monorail car—that a rotating body will maintain its axis of rotation in the same direction unless a moment of force be applied to it.

But what actually happens when the modern high powered rifle? Does it shoot a bullet that goes in sideways? To a slight extent it may be stated that the modern army bullet does do that very thing. Its velocity, however, is so enormous that the gun barrel does not have to be elevated through so large an angle, and consequently the bullet enters fairly on its nose, though not squarely so, at all ordinary ranges.

The same may be said of the bigger guns. They have rifling in them and so give rotation and gyroscopic action to the projectiles. But a mortar does not. A mortar shoots something almost straight up in the air and lets it fall down. As the mortar is too short barreled to rifle the top of the projectile would hit a target a long distance away, but for a shot almost straight up in the air to fall right down of course the bottom of the projectile would strike first. The mortar projectiles are generally round, so that it will not matter how they strike.

The reason a bullet cannot be made so that it will always enter a target squarely on its nose is that for every range a differently shaped bullet would have to be manufactured, also the bullet should be symmetrical, so that the air will exert no disturbing influence on its distorted parts.

A bullet has a distinct curve like that of a baseball, due to its rotation, and this curve is independent of the parabola given by gravity. The smoother and more polished a bullet is the less is this curve. But the action of the rifling in a gun barrel puts little grooves in the bullet as it goes through the barrel. These catch the air as the bullet rotates and causes the curve spoken of.

If the bullet be rotated in the direction of the hands of a clock the curve will make the bullet go to the left of the exact point aimed at. The effect is so small, however, that it does not have to be taken into account in the manufacture of rifles and ammunition.

TWO OFFICES TAKE OVER A THOUSAND

Clerk's January Collection: Run Nearly Seven Hundred Dollars

SHERIFF'S BOND IS APPROVED

Executive Orders of County Court Few and Far Between in February

Two offices, that of the county clerk and county recorder, did a land office business in January. The Clerk's report shows that he collected \$672.30, while the recorder's office followed with \$33.65. The totals make over \$1000.

The court heard no objections to the appointments of judges and clerks and elections, and aside from a change here and there where appointees begged off, there were few corrections. The matter is still in statu quo, and will again be taken up if complaint be made.

The Supervisor of Road District No. 6 was ordered to open Road No. 667 for travel.

Tax Collection Sheriff Reeves filed his bond in the sum of \$30,000 as collector of the 1915 taxation, with the National Surety Company as surety. This company is a New York concern, and has filed with the secretary of state with evidences of assets.

Compensation for the court proceedings were fixed at \$25 per month for the official newspapers, the Argus and the News-Times.

Claims were allowed as follows for the February term of court.

R & H—E Barnes, \$25; Beaver-ton Garage & Gen Blacksmith Co, \$45.00; J M Hiatt, \$12.40; C W Redmond, \$3; Oregon Electric R Co, \$1; J E Carpenter, \$1; C R Rector, \$19.90; A W Hoffman, \$7.55; Hod-son & Co, \$65.95; Wm H Lester, \$12.00; Coast Culvert & Pume Co, 3 bills, \$28.38, \$55.95, \$1.00; Beaverton Hardware & Im-plement Co, \$12.90; M S Allen, \$2.05; John Herb, \$1; E M Chandler Lum-ber Co, \$1; Copeland & McCready, \$1.33; Haulenbeck Bros, 2 bills, \$2, \$1.15; Scott Allen, \$6; Han Cornils, \$1.25; Badger Lumber Co, \$31.90; J. THE OREGON NURSERY CO.

At Orenco, Oregon, now has an experienced and practical landscape man connected with its large Nursery. Any one de-siring to improve his home-grounds by the planting of trees, shrubbery, etc., will find it convenient and helpful to get his advice and suggestions on any plantings contemplated. This is entirely free.

Those who have ever stopped off at Orenco and gone over their large acreage of ornamental nursery stock, need not be told that it is the largest and most complete on the Coast. If you have not seen it you should arrange to do so at your earliest convenience. If you are contemplating the planting of any ornamental stock, you should endeavor to set it this Fall so that it may get the benefit of our Fall and Winter rains: 38tf

Regular services at Christian Church, next Sunday. Bible school, 10; preaching at 11 o'clock a. m.; Y. P. S. C. E., at 6:30; preaching, 7:30. All are cordially invited to attend these services.

Spirella Corsets—Not sold in stores. A question and a suggestion. Have you any corset troubles? If so, let Spirella service cure them. Over three million satisfied Spirella wearers testify to the ease, comfort and perfection of style produced by Spirella corsets. Many exclusive designs from which to select the corset best suited to your individual needs. A Spirella residence corsetier in this field. My advice, experience and training are at your service, without obligation. Appointments by letter or telephone given prompt attention.—Phone Main 884. Residence, Fifth and Jackson, Hillsboro, Ore. 33-46

I have \$6500 or \$7000 that I would like to place in one loan on good farm lands. Who wants it?—E. L. Perkins, Commercial Bldg., Hillsboro. 32-1f

Do not forget to ask for a Schiller when you want a good 10 cent smoke—no "cough dust" in the Schiller. 13tf

Hear Pastor Wm. A. Baker, at Odd Fellows Hall, Sunday, at 3 p. m., on his free bible lecture, "The Sign of the Son of Man."

The Moose lodge will have a big spread on the evening of Feb. 24. All members are invited. Big time. 47-9

Saloniki.
The Greek seaport, Saloniki, is the same as the old Thessalonica that was visited by the Apostle Paul in 51 A. D. and to which were sent the two epistles, First and Second Thessalonians, in the New Testament. The original name of Saloniki was Therna or City of Hot Springs. Then Thessalonica, so called after the sister of Alexander the Great, and then shortened and made Turkish into Saloniki.

Pachmann's Frank.
M. de Pachmann's keyboard eccentricities are notorious, and he is the hero of scores of amusing sayings and stories. One of the latter tells how in New York he once went and had a piano lesson from a lady who advertised first class tuition at 25 cents a lesson.—Argonaut.

"See See," She Laughed.
Wife—Tom, you don't treat me to see half as often as you used to! Hub—Marriage, my dear, makes necessary the practice of frigid economy.—Boston Transcript.

Make the most of time; it glides away so fast. But method teaches you to gain time.—Goethe.
