A Board of Inquiry into the freight wreck, consisting of S. P. officials and W. W. Boscow and C. B. Buchanan, of this city, returned findings that "It is the opinion of this Board that the accident was caused by failure of Engineer Hoberg to bring his train under control approaching yard limit sign, disregarding provisions of Rule 93, and that Conductor Swain was also responsible for not checking speed of his train. No recommendations." The collision took place 1000 yards inside the Yard limits, and the engineer had an unobstructed view of the gravel train 420 feet, and the fireman, a live view for 990 feet. The cost was fixed at a total of \$1,690, viz: Damage to equipment and contents, \$1,465; track, \$25; clearing wreck, \$200. The East bound train was speeding at 15 per hour. All three of the injured men are out of danger.

An auto, containing four people, turned turtle over a 25 foot embankment near the Dilley Lutheran church, Sunday. Aside from a shaking up no one was seriously injured. The many friends of M. E. Everett in this city, will regret to learn that his drug store at North Bend, Ore., was destroyed by fire Sunday morning. His loss in stock amounted to \$12,000, with insurance to cover the loss so far as per cent. is concerned. In any event Mr. Everett stands to lose several thousand dollars, the advance in drug values having largely increased his assets. The fire started in a building close by. Miles is well known here, being a brother to Franklin Everett, of Hillsboro, and to Mrs. J. M. Brown, of Banks. He at one time conducted the Delta Drug store in this city.

The "Tualatin" issued by the Tualatin School, is a bright number, and does credit to the staff which edited it. Miss Edna Geiberger was the editor in chief; Clara Luethi, assistant, and their assistants were Menga Batalgia, Dorothy Byrom, Florence Walgrave, Francis Hill and Edna Ladd. Paul Cooper and Rey Geiberger were the business managers, and the publication is a credit to them. An editorial by Miss Geiberger is splendidly written and would put to shame many country newspaper men—from a standpoint of diction. The way she evades the use of the personal pronoun "I" is refreshing, and her article shows that she takes a comprehensive view of affairs that are today agitating a world.

DID YOU EVER CONSIDER

That your watch is normally "on the job" 24 hours each day?

That in each 24 hours the balance wheel vibrates more than 400,000 times?

That a variation of 100,000 of a minute in each of these vibrations would cause a variation of more than 4 minutes a day in the time of your watch?

BY ACTUAL COUNT

143 distinct parts must be given individual attention when the average watch is properly cleaned and oiled.
