**PARTY SUFFRAGE RECORDS**

Only Democratic Congressmen Appeared for Action.

Congressman C. C. Dill, of Washington, cites the records of the committee hearings on suffrage in Congress to prove that "the only Congressmen who have gone before the Judiciary Committee of Congress this year to ask that a suffrage amendment be voted upon have been Democratic members." He adds that "no others have appeared to ask for consideration of the measure. That is, I think, sufficient answer to any claim that the Democratic Party opposed Woman Suffrage."

This record need only be supplemented with the personal voting history of the rival Presidential candidates to show who is the real friend of suffrage. President Wilson made two trips from Washington to New Jersey to register and vote for Woman Suffrage when it was submitted in his State. Candidate Hughes did not take the trouble to register or to vote the same year—1916—when the suffrage amendment was submitted in his state.

"There is no means of judging the future except by assessing the past. Constructive action must be weighed against destructive comment and reaction." — From President Wilson's Speech of Acceptance.

## Scientific Proof of Maxwell Fuel Economy

In a test made by David L. Gallup, M. E., Professor of Gas Engineering, Worcester Polytechnic Institute, a stock Maxwell Touring Car made from 23 to 33.7 miles per gallon of gasoline at speeds ranging from 10 to 35 miles per hour. We reproduce a letter from Professor Gallup concerning this test.

DAVID L. GALLUP, M. E.  
 Consulting Engineer

Sept. 1st, 1916.

Maxwell Motor Co., Inc.,  
 Detroit, Michigan.

Gentlemen:—

I beg leave to submit the enclosed blue print giving the results of an economy test made on a 1917 Stock Maxwell Touring Car, furnished by your Boston representatives.

The curve is self explanatory and needs no discussion other than the statement that the carburetor, which was stock, was adjusted to give the best combination of power, flexibility, speed and economy, for such conditions of touring as would ordinarily be encountered.

In tabular form the results (taken from the curve sheet) are as follows:

SPEED (Miles per hour)	ECONOMY (Miles per gallon)
10	33.7
15	32.7
20	31.2
25	29.6
30	26.1
35	23.0

Respectfully submitted,  
 D. L. Gallup

DLS/K

NOTE that no unusual means were employed to get these results. The car used was taken from stock; the test was made with a full load and with top and windshield up; the regular Maxwell carburetor was used.

Any Maxwell car is capable of giving this same economy in gasoline consumption.

Maxwell operating economy matches its economy in first cost, making it *The World's Greatest Motor Car Value.*
