

SCHOOL BOARD ASKS CARE FOR HEALTH

Want Co-operation of Parents to Prevent Epidemics

GOOD CARE CAN MINIMIZE INFECTION

Common Colds Frequently Responsible for Spread to Others

The members of the Hillsboro School Board are anxious to safeguard the health of the school attendants, especially to prevent the repetition of the epidemic of sickness which harassed the school last year, and caused not only suffering on the part of the victims and expense on the part of the parents, but also the shutting down of the school plant for a week. To that end they are desirous of impressing the parents with the necessity of keeping their children from school when they have bad colds or catarrh.

Contrary to the prevalent impression which is author of the phrase, "Oh, it is only a cold," colds are a serious menace to health. Medical authorities agree that colds are not only themselves wearing on the vitality of the system, but are also the frequent forerunners of more destructive diseases. Tuberculosis of the throat and lungs, pneumonia, bronchitis, tonsillitis, pleurisy, and neuritis often trace their beginning to a severe cold.

A second false belief is that the person who has the cold is the only sufferer, that he may go about his business with comparative impunity without endangering others. But far otherwise, colds are quite contagious. It is a measure of social health to prevent their spread.

To the parent taxpayer who finds the school levy high, it might be suggested that much money may be saved the district by keeping the children in health, the state school money is distributed pro rata according to days attendance. The pupil who attends regularly is more financially valuable to the district than the one who misses frequently. The parent who allows a child afflicted with a cold to attend school and help start an epidemic is cutting down the attendance and taking money out of his own pocket to pay for his negligence.

MISS SIMPSON WRITES

Miss Mary A. Simpson, well known here when she resided with her uncle, the late Thos. Otchin, writes the Argus from Bridlington, York, England:

"I have been staying at an inland village about 60 miles distant, where I went to be away from the noise and shock of the anti-air craft guns. Thus far they have not been needed and I sincerely hope they will not be. There will be many a thrilling story to be told after the war. At present the censor forbids, and we think it a very wise precaution. Regards to my Hillsboro friends."

CARNATION CO. STARTS ON \$50,000 BUILDING

Tearing Down Wooden Structure to be Replaced by Cement and Tile

PLANT THEN UNEQUALLED BY ANY

Company in for \$125,000 Building Investment in Hillsboro

The Carnation Milk Products Company yesterday morning started operation on wrecking their wooden building at the plant at the foot of First Street, and in its place will be built a \$50,000 concrete and tile structure. This is the second unit of construction voted two years ago, the first unit, finished a year ago this Fall, having cost over \$75,000. The fact that Hillsboro is a big central point for the Washington County milk supply has caused the Carnation Company to look with favor on this city, and insures the permanency of the plant at this point.

The concrete and tile building completed months ago is an asset of which Hillsboro is proud, and the new expenditure places the town in front rank as a condenser point.

The second unit is to be 100x170, two stories.

A big crew of men will be employed and construction will be rushed so as to have the structure completed before the first of the year if possible.

Consulting Engineer McBriar has evolved plans for the building and O. Boen will have charge of construction.

The condenser has been paying top prices for milk and sets the lead for Portland buyers.

ABSENCE AND TARDINESS

The attention of the parents of High School students is called to the fact that there are too many students who are late or absent, and that such tardiness or absence directly affects their scholarship.

The student who is habitually absent from classes soon gets behind and is very apt to fail in the subject. We want to eliminate all such failures this year and also keep our records as near perfect as possible, and are asking you as parents to cooperate in this matter. Oregon School Law Sec. 339 reads, "No excuse shall be accepted by any principal or teacher (for absence) unless such absence was caused by the pupil's sickness or by the sickness of some member of the pupil's family, rendering it impossible for such pupil to attend school during said time. Eight unexcused one-half day absences in any four weeks of the school may be in session in such district shall be called irregular attendance."

The excuse should be brot the day the student returns to school and taken to the principal for approval. A. P. Patton, Principal High School.

Quite a number brought in animals around a thousand pounds and the buyer coolly informed them that he was not buying under 1,200, and that the bills were error by a printer. One man brought in a horse 15 miles, and went away sore as a defeated candidate, and he had mighty good reason.
