## COUNTY AGENT SENDS LABOR LETTER OUT

Asks Farmers to Take up Matter at School Meetings

## ALL TO PULL TOGETHER

Encloses Cards so all May Make Labor Wants Known

County Agent Jamison has sent out the following letter to all school districts:

"Dear Sir: The matter of farm labor shortage is one that is becoming rather serious and will need considerable consideration during the next few months in order that all the crops be harvested and nothing lost. It is going to be necessary for neighbors to cooperate to the fullest extent and disregard line fences which have, in some cases in times past, prevented fullest cooperation.

We believe that the labor proposition can probably be handled best by communities. To this end it is requested that this matter be taken up at your school district meeting June 17th and determine at that time the number of hands that will be necessary to have brought to that district for the harvesting of the hay crop and as nearly as possible to determine the number needed for harvesting the grain.

With this information on the whole county we have reason to believe that we can obtain some relief from the different cantonment camps or sources that may happen to have an over supply.

In this connection it is hoped that all will realize the seriousness of "drafting the men from the army" for the farms. Every one knows the necessity of having every possible man in training and it is hoped that it will not be necessary to interfere with the training for the harvesting of farm crops. In a large measure these can be harvested by the farmers in each district assisting one another and with the additional help of some of the farm raised business men in the small towns of the county who have already expressed themselves as willing to close their business if the farmers would accept their assistance and if they could be of any service.

In some cases though we may be still a little short and that is the purpose of taking the matter up in your school district meeting. Believe it will be advisable to get the largest possible attendance at this meeting so that you may learn the exact needs of the district. In some cases it will probably only take 3 or 4 men for the whole district to harvest the crops for that section.

In most cases it will be necessary to have one farmer responsible for the employ of each man thus requiring 3 or 4 farmers to assume the responsibility for the hiring of 3 or 4 men that are asked for, for your district. Cards are being enclosed for you to fill out showing number of men needed and names of farmers who will use these men for the period named or who will see that they are employed in your district for that time. It is understood, of course, that this help is only for a short period. Where regular help is desired the only thing we can suggest is the several employment bureaus which may occasionally have good men that they can send out.

Hoping that your district will give this matter their serious consideration and that should you find some other method more satisfactory that we may be advised so that the labor situation in Washington County may be handled to the best possible advantage. "I am Very respectfully,"

At a meeting of onion growers held at Kinton, June 1, it was decided to carry on some trials in the combating of the mildew disease which during the year of 1916 destroyed 40 per cent. of the onion crop. H. P. Bars, Plant Pathologist of the Oregon Agriculture College, was present and outlined methods which had been practised on the farm of J. C. Leedy the past season, and which had promise of proving successful. An experimentation committee was appointed, consisting of J. C. Leedy, B. C. Schuemerich and W. E. Snider. Through an arrangement with Mr. Bars the committee will decide on which farms the trials in the prevention of disease will be carried on and will furnish materials for the trials. Mr. Bars will personally oversee the application of the different sprays and will visit the fields from time to time. Twenty growers from that vicinity were present and expressed themselves as being very much in favor of conducting these experiments.

## FLOUR DEALERS

Am just in receipt of advice from Mr. Ayer's office that arrangements have been made to load all contributions of flour, which are turned over to the Government by patriotic dealers and citizens, directly into ships built at Portland for direct shipment to France.

Blanks and drafts have been forwarded to all dealers for the purpose of gathering and paying for such flour. Any dealer in Washington County who has not received these drafts and instructions please advise me at once by telephone.

The number of instances where flour is being turned over to the Government is increasing every hour as patriotic people realize the dire necessity of turning over their supplies.

Any amount is acceptable be it great or small, so long as the flour is in good condition for export. We hope that Washington County will make a showing of its patriotism in this movement that we can proudly compare with other Oregon counties.

Yours truly,  
CHAS. E. WELLS,  
County Administrator.
