LARGEST TURNOUT ATTENDS LUNCHEON

Business Men Hear From G. C. Reiter on State Highway Work

GIVE BETTER TOWN IDEAS Phelps Tells Associates He Wants Help for Celebration

The business men's luncheon at the Hotel Monday eclipsed any yet held, every plate at the table being occupied, with room made for more. J. H. Garrett presided. C. G. Reiter, who is handling the grades for the State Highway, told of the progress of the contractor and explained why the work was not yet hitting its best stride. He said that in the near future the contractors would doubtless put on an extra shift so as to have the work completed by late fall. He stated that considering everything this county was getting treated very nicely by the commission. He said that the contract for the mileage between the two county lines would be let this season; that the highway would be completed between here and the Grove by winter; that the Gaston-Forest Grove base would be laid, and this, with the Rex-Tigard road, would give us a fine representation on the six million of bonds in the original legislation.

B. W. Barnes, R. R. Easter and C. B. Buchanan were appointed to look into the proposition of establishing a camp ground for motorists passing through, and they will report later.

Ed. Schulmerich reported that the council had taken hold of the celebration, and had appointed O. Phelps to direct affairs. Mr. Phelps briefly told what was being done, and said that all committees had been named.

Messrs. Wells, Weil and Johnson were named to formulate a plan for the business men to pass upon the worthiness of solicitation of funds coming from the outside. There was some discussion as to taking up the matter of a permanent pavilion at the city park, and this will be threshed out in the near future.

Grover Combs and M. H. Stevenson were named to look into the matter of mileage signs for the county seat. C. E. Wells read a paper in which this necessity was brought out. W. W. Boscow and W. G. Hare made short talks on celebrations and the conduct of the city towards its guests, both endorsing the matter of a permanent building at Shute Park for amusements.

Mr. Hare contended that we needed something of this nature at all times and cited the condition which will obtain when we give the returned soldiers and sailors a welcome.

The woodshed of Carl Larsen caught fire early Monday morning, and before the flames were extinguished the structure was practically burned, with perhaps a total loss of from \$250 to \$300. The wall of the residence next to the burned woodshed was badly scorched, and a hose attached to a faucet stopped the blaze long enough to keep it down until the city department reached the place. Larsen lost a lot of fine tools that descended from the father's estate, and these alone were worth quite a neat little sum. The department was late getting out as the alarm was slow going through central.

Some big fours (used) Overlands, and others at right prices.—E. L. Perkins. 3-1f

Dinsmore expects to locate in Hillsboro and resume the practice of medicine. Prior to enlistment Dr. Dinsmore practiced at Oreno. Mrs. Dinsmore went to Portland to see her husband as he passed through.

NEXT SPRAYING TIME IS DRAWING NEAR

B. Leis, of the Aetna Orchards, Calls Attention of Growers

JUNE 20TH IS THE DATE

Beaverton Man Reminds County Orchardists of Codling Moth

B. Leis, of the Aetna Orchards, Beaverton, writes the Argus the following letter which is recommended to all fruit growers—Editor Argus—

I am very much pleased to see so much interest taken in our orchards. This is true, at least in my neighborhood, as I have to answer all sorts of questions. Now, if we have to believe all we hear and read the Codling Moth are all sitting on the fences ready to swoop down on our trees to get in their deadly work and destroy our apples. Well, I do not think there is any cause for it, as I do not think that the weather has been very favorable for them thus far.

I have not made it a practice of spraying any sooner than about the 20th of June, and always with the best of results. This is, of course, the second spraying for worms; and the last spraying comes about August 20. Out of about 140 boxes of apples I found two apples wormy, so I believe I could not do much better if I sprayed three or four times more. I have an orchard in my mind that I took care of last season, the owner being a non-resident. The crop of 1917 sold for \$25. I believe that every apple had from 2 to 3 worms (this was a 14-acre tract). I gave it the usual spraying and as I was told by the purchaser of the crop there were not over one percent so bad, if we consider that last season it was almost next to impossible to keep the worms out of the fruit, as it seemed the Codling Moth hatched all of the growing season. For this second spraying I use 2 lbs neutral arsenate of lead paste to 50 gallons of water. The same formula is also used for the last spraying about August 20th. I find in my 30 years of orchard practice that three sprayings with arsenate of lead will control the worms if the work is done at the proper time, and, of course, thoroughly. In my last letter I spoke of powdery mildew (it seems to be very prevalent) and also how to control, as recommended by the U. S. Dept. of Agriculture. By my own experience the Summer spray recommended by them I found effective. Some years ago I was awarded 100 Jonathan apple trees for having the best apples on exhibition. When the trees were small I gave them the usual winter treatment and pruning, but did not spray them during Summer except for apples, using Black Leaf 40. They got infested badly with the powdery mildew. As soon as they began to set fruit I sprayed with lime and sulphur, summer strength, 1 to 40, and the mildew all disappeared. Now, as I am speaking of my practical experience in my own orchard, I would recommend getting Extension Bulletin 224, Orchard Spray Program, for 1919. It is full of useful information, and can be had for the asking, or, I think, from the county agent.

Attorney Chas. Anderson returned the last of the week from an extended trip into the Alberta, Canada, country. He and his companions made a trip into the big coal deposits, and were penned up in a cabin for 24 hours, awaiting the blowover of a snow-storm. When it abated they found 15 inches of new snow to negotiate in order to reach the rail lines. Mr. Anderson and his associates leased a big coal deposit—real-honest-to-goodness coal—into which a rail line has been surveyed. They crossed streams in instances where they had to swim their horses and float their camp outfit across on rafts.

The Hillsboro Trading Company, Messrs. Connell, Kerr and Freeman, have bought the Larsen & Johansen feed business in the Harttrampf building on the P. R. & N., and Clay Freeman will have charge of the selling end. The new firm will make improvements and will put in a larger stock. They have taken possession.

L. J. Rushlow was found guilty Thursday, in the Judge B. Reasonable court for offering his property, opposite the Oregon Electric depot, at a price people will think something wrong with Hillsboro, and that improvements add no value—but such is not the case, as everyone knows prospects were never better, and the offer is at such a price there is no question of this being one of the best investments in the county. No trades considered. Business not for sale.—Call on or address 1320 Washington St., Hillsboro. 12-14
