

ALL CIVIC BODIES ENDORSE TWO BILLS

Higher Educational Measure and Elementary Schools Bill

NO ONE PREDICTS RESULT

Silent Vote is What Will Count at Coming Primary

While no one appears to be able to predict the outcome of the two school measures on the coming primary ballot, and no one appears to want to pose as a prophet owing to the silent vote, it is a matter of history that nearly every civic body has endorsed two measures coming before the voters of the late on May 21.

These bills are what are known as the Higher Educational bill and the Elementary School bill.

The Elementary school bill will not increase taxes in the big districts, and rarely in any district, except in those in the sparsely settled communities in the hills, where six months schools are being maintained. The measure will provide, if it shall carry, a flat two mill tax, thus enabling boards of directors to have sufficient money in these districts to maintain schools and hire teachers at the present scale of salaries. Hillsboro will not be affected. Forest Grove will not and scores of other districts will not for the simple reason that special levies are necessary, anyway, and the districts will levy what they need in excess of what the two mills will provide.

Inasmuch as all commercial clubs, Grangers, and all other bodies which are public or semi-public favor it, it looks as though the Higher Educational measure on the ballot will pass, although some are fearing the non-talking vote. If it shall pass it will mean the small increase of \$10,000 per annum for Washington County over what is now paid.

Garden time is coming soon and Greer, Powers & Co. is the place to get garden seeds. 5111

Last Saturday was the quietest day in Hillsboro for many moons, as hundreds of farmers were at home putting in their crops. The spring has been so late that when the good weather came all hands and the cook were requisitioned to get the sowing done. Fall and winter sown grain never looked better than it does just now and there should be a record crop.

The Warren Company's patents on their paying formula expired yesterday, but if this makes any difference with the Warren people it will be a surprise to those who are acquainted with their record. If it isn't that patent it is some other confounded thing that puts up the price of paying. In olden days the Warrens got a big price because of their royalty, and today paying costs money because of the advance in labor and material. And there you are.
