ADDED PROTECTION FOR OUR PATRONS

REALIZING THAT OUR PATRONS WHO HAVE SAFETY DEPOSIT BOXES IN OUR VAULT NEED every protection a safe banking house can give them—and appreciating the fact that in these Safety Deposit boxes there are upward of a half million dollars worth of negotiable securities that might be cashed elsewhere, we have invested a handsome sum in the new

Latest Burglar Alarm System

A system which works day and night, and is ever ready to tell us if anyone is tampering with our vault. The enterprising burglar can not get away from this alarm system. It tells the story in the immediate vicinity of the bank and carries its message distant from the bank. The burglar can not sidestep it. He can investigate to his heart's content; he can cut wires all he wishes; he can tax his ingenuity to the utmost—and still that modern burglar alarm will be working and telling the public that an outsider is trying to make his way into the Shute Bank vault. This is why we have installed the most perfect system of alarm known to banking circles. See the system demonstrated after 4 p. m., on October 26.

A robber can enter our banking house and order all hands into the vault—but this will not protect him. The alarm will talk at once and Mr. Burglar will see he has tackled the wrong bank—that he is in bad—and if he doesn't look out he is more than likely to run up against a little instrument that will make him see the error of his way.

We are proud of the protection we are giving our patrons, and that has ever been our policy. Take no chances. The best is none too good for our patrons. To walls of steel we add a mechanical device that is the best "watchman security" house ever installed. On Oct. 26 the county bankers will be here. After 4 p. m. on that day come in and see the system demonstrated.
