

# "In Every Respect"

says the Good Judge

You get more genuine chewing satisfaction from the Real Tobacco Chew than you ever got from the ordinary kind.

The good tobacco taste lasts so long—a small chew of this class of tobacco lasts much longer than a big chew of the old kind. That's why it costs less to use.

Any man who has used both kinds will tell you that.

Put up in two styles

W-B CUT is a long fine-cut tobacco  
RIGHT CUT is a short-cut tobacco

### NURSING FISH

Oregon has achieved fame for its system of hatching, nursing and developing salmon until they are able to take care of themselves in the open waters of the Pacific. The Oregon system of hatcheries in connection with feeding ponds is attracting the attention of other states and even the federal authorities. Appropriations for artificial fish hatcheries in the future by national, state and territorial governments will have to be expended along the Oregon system of handling this industry or the taxpayers and those engaged in taking and canning and curing of salmon and other food fish will want to know why more money is being wasted on obsolete methods.—Oregon Manufacturer.

Mr. Winters has spent his entire life in the Middleton section, and but few days have been entailed in absence from the old place. While he is now in his 72nd year, he feels the importance of getting out to see what his county can do in production. While in Hillsboro he gave the Argus his respects.

In Their Place—  
What Would  
You Have Done?

This was the situation:

The Overland had no serious competition at its price, and at its price it had no competition as to quality.

Overland plants were working to capacity, 600,000 Overlands had been sold, and a continent was clamoring for more.

Then the Overland organization became concerned about the price of gasoline.

Now, gasoline is not Overland business, but it becomes Overland business when the welfare of Overland owners is at stake.

The sale of an Overland is the beginning and not the end of Overland interest in the man or woman who buys it.

So Overland designers were told:

"Gasoline is continually going up. Every cent advance increases the upkeep of the Overland. Go back to your draughting boards and bring it down!"

Months and months of experiment!

Millions and millions of expense!

And then, up and out of the Valley of Dilemma, leaping into the road like a thing possessed—

Begin Today To Get More Mileage For Your Money!  
97 Cities Report an Average of 25 Miles Per Gallon in the Overland Sedan

**Overland**

The Economy SEDAN

E. L. PERKINS, Hillsboro, Ore.

A GREATER OVERLAND, built of light alloy steels, mounted on the famous Suspension Triple Spring, and giving unheard-of mileage out of every gallon of gas in her tank!

Overland designers said: "We don't know what it cost to create, but we do know it will cost six millions to get ready to use it!"

The answer was: "The public has stood by the Overland, the Overland must stand by the public. Go ahead and equip your plants to produce it."

\$6,000,000 for an ideal!

In the Overland Company's place, what would you have done?

Some organizations would have said: "The present Overland is good enough. Why quarrel with success?"

But the Overland theory is, that nothing is good enough that can conceivably be better, and that the great family of Overland owners have placed upon the Overland Company an obligation, not only to produce, but to progress!

In that spirit, the Overland was created.

In that spirit, the Overland is presented.

And now, in that spirit, let us get together!
