

# Look to Your Paint

Is It Giving You Protection?

**IF CHECKED** or cracked, new paint is needed, and it will be cheaper to paint now—for deterioration costs more than good paint.

A well painted home brings several hundred dollars more on sale and more in rent. Keep it painted and it stays new for years.

The best paint spreads more easily—saves labor cost. It covers more square yards—you buy more gallons of cheap paint.

The best paint then protects the house, if properly applied, from five to ten years longer.

There is no question as to which costs less. Don't allow surfaces to rot. It costs less to paint them.

The best paints are scientific in formula and preparation.

We've made them for 72 years—to meet weather conditions in the West.

The best materials—**PIONEER WHITE LEAD**, pure linseed oil, zinc and color—are combined in Fuller Paints in scientifically exact proportions with long-time skill.

Our process super-purifies and "whitens" the lead base. It must be fine enough to pass through a silk screen with 40,000 mesh holes to the square inch. Fine lead means easier spreading and a more elastic, tougher protective coat. The "Whiter" lead base means more beauty in the colors.

Such paint will, if properly applied last from five to ten years longer than cheap paint, and look better through the years.

## THE BUICK

The Buick name is the Buick's best salesman, and Buick 1921 models have added prestige to that name. The new models possess the known Buick reliability to meet every condition of travel. To that reliability there is added comfort resulting from improved seating arrangement and spring suspension and easier control of mechanism. And the new lines are beautiful. Each car's reliability is re-inforced by authorized Buick service. The regular equipment on all models since January 1 includes cord tires. You should see these new models to appreciate them.
