A NATION OF GIVERS

It is a significant fact that the United States has been the greatest giver for good of all the world and in the past five years it has granted in charity, perhaps, more than all the rest of the world put together in the past fifty years. Millions of dollars in money and foodstuffs have been sent to the starving people of Europe, and millions are now being subscribed weekly for the same purpose. Paradoxical as it may appear much of these subscriptions is going to feed people in countries where the supreme effort is to crush the representative form of government as it exists in the United States today.

Notwithstanding this the cry of little children does not fall on deaf ears in America. The day is past when a citizen of the United States harps the age-long query, "Am I My Brother's Keeper?"

Ireland has accepted the British proposal for an Irish Free State with governments similar to that of Canada and Australia, and the pact was acquiesced in by the Irish parliament Tuesday. This means a new era for Ireland. The vote was very close, but was decisive. While it is not all that Ireland asked it is a great step towards freedom and Ireland stands in the position of having

the protection of the most powerful of Old World nations. It is expected that Ireland will have internal troubles for a while, but in the end peace and quiet will prevail. Just what Ulster is going to do remains to be seen.

It begins to look as though Portland will have to finance her Fair if she wants one in 1925.

It is not at all wonderful that the Island of Yap has been making trouble. Yap has been making a disturbance ever since man has had a language.

Woodrow Wilson coined "Peace Without Victory," and not to be outdone, Henry Cabot Lodge and his clique minted "Victory Without Peace."

TO JOINTLY INSTALL

The Pythian Sisters of Phoenicia Temple and the Knights of Pythias Lodge, Phoenix No. 34, meet tomorrow night to jointly install officers for the ensuing term and the rendition of a short program.

Pythian Hall has been given a thorough going over, and the floor has been relieved of its carpet, excepting at the outer lines of the hall.

All members of the orders are expected to be in attendance tomorrow evening.

Mabel E. Nesvold, who married Reuben Nesvold in July, 1920, wants a decree of divorce from her former lord and master. She swears that he accused her falsely many times and called her vile names in the presence of others. So she sang a few bars of "Reuben, Reuben, I've Been Thinking" and started her suit for freedom. Mabel's pleadings are different in a way from the usual stereotyped complaint, for she says she wants the restoration of "her maiden name in order to blot out as nearly as possible all remembrance of her marriage to Reuben." This is refreshing to say the least.

\$10,000,000 FOR NEW FREIGHT CARS

Union Pacific System Will Build Them All With Lumber From Northwest Mills.

The Union Pacific system will expend immediately nearly \$10,000,000 for increased freight car equipment, according to announcement yesterday through the local offices. This is among the first announcements of railway expenditures that is of importance to the Pacific northwest.

The contracts which require the expenditure of the money call for the building of 4500 new freight cars to deliver the first six months of the year. The contracts require the use of lumber from the territory to enter into the construction of the cars. Several million feet of fir lumber will be used in building the cars. The railway officials have specified that the car builders who will erect them in the east obtain this lumber from mills on the Union Pacific line in this section.

Of the 4500 cars, 2000 will be double-shooted 40-foot, 50-ton box cars; 1500 will be special double-shooted 40-foot, 50-ton automobile cars for general service, including movement of grain in bulk, and 1000 are to be steel 30-ton, 50-ton automobile cars suitable also for general freight service.

The building of the special cars for the carrying of bulk grain will be of great benefit to the grain shippers of this section. These cars will be tight and moisture proof. It is planned to keep them in service for shuttle service back and forth from grain-loading stations to railroad terminal and shipping points at the time of year when grain is moving in its greatest bulk.
