At 3000° F.- What?

As your motor begins to "warm up," what happens to the oil? It thins, of course. But just how does it thin and how does it act when subjected to the high operating temperatures?

Upon the answer to that question depends the proper lubrication of your car.

Zerolene, being made from selected crudes and scientifically refined by our patented vacuum process, resists engine heat; it retains its lubricating "body" at all operating temperatures. It does not decompose or "break down." It clings to the bearing surfaces and maintains a perfect film of lubricant.

A Minimum of Soft, Flaky Carbon

If the motor is getting proper lubrication, some oil slips past the pistons and is consumed by the flame of combustion. In burning, all oils deposit carbon on the cylinder walls and cylinder heads. Inferior oils deposit a hard, gritty carbon in considerable quantity.

It is this hard carbon deposit which causes pre-ignition, breaking and sticking of cylinder rings, overheating, loss of power, warping and splitting of exhaust valves, and wear of valve stems.

Zerolene deposits a minimum of carbon of a soft, flaky nature which can do no damage and is usually blown out with the exhaust.

Lubricate exclusively with Zerolene, adopting the recommendations embodied in the Zerolene chart of recommendations, and you will develop the maximum power, speed and gasoline mileage of your car.

FARM FOR SALE

A farm of 116 acres, best land, between 60 and 70 acres under cultivation; some standing timber; 2 sets of buildings; one set first-class barn with room for 25 cows; silo attached; swing stanchions; milk house and cooler in barn; air pressure water system all over the place; 8-room house with full plumbing; piping also extending to the barn; have promise of electric light to house this winter; good macadam road leads from paved highway right to place and to my garage; two milk routes past place; mail route; condenser route to Hillsboro. Place is southeast of Cornelius four miles, and same distance southwest of Hillsboro. A fine producer. Would consider some city property as part payment; balance long terms, 6 per cent interest.

Henry Voelker.

Gabe Essner and Henry and Geo. Meacham, of above Mountaineer, were greeting friends in town Friday.

The UNIVERSITY of OREGON contains:
The college of Literature, Science and the Arts with 22 departments.
The professional schools of Architecture—Business Administration—Education—Graduate Study—Law—Medicine—Music—Physical Education—Sociology.

The 47th Year Opens October 2, 1922

For a catalogue or any information write The Registrar, University of Oregon, Eugene, Oregon.

NOTE—The Red Top tin contains Velvet that has recently been delivered from the factory. It is in fresh condition—cool and smooth in a pipe.

Each tin of
Velvet
TOBACCO
with the RED TOP

contains freshly made tobacco. Just right for your pipe.

And the mild smoothness you enjoy is the result of Velvet's two long year's ageing in wooden hogsheads. Patient ageing in Nature's way—the right way of removing raw harshness and bite.

You'll say that Velvet is cool, smooth and "sweet as a nut" in your pipe.
