We Want to Talk to Every Prospect Who Plans to Pay More Than \$500 for a Car

We want to tell you something about the Studebaker Light-Six Touring Car. Want you to examine it—and to drive it.

Step in and let us prove what a vast difference there is between the Light-Six and other cars at about the same price—or between the Light-Six and cars of other makes costing several hundred dollars more.

To be able to buy a Six, practically free from vibration, for less than \$1,000 is an opportunity not duplicated anywhere in the world. Elimination of vibration adds immeasurably to the life of the motor. It is one of the reasons for the universal high resale value of the Light-Six.

The Touring Car body is all-steel—even to its framework. Seat cushions—of genuine leather—are ten inches deep and are placed at the most restful angle.

The one-piece windshield is handsome and practical because it gives unobstructed view of the road ahead and is rain-proof. The quick-action cowl ventilator and the parking lights are but indications of the quality and completeness of the appointments.

No other make of car ever built, by anyone, at any price, represents so great a dollar-for-dollar value as the Light-Six Touring Car. The savings resulting from large volume, complete manufacture and the fact that Studebaker's overhead is shared by three distinct models make possible its low price and high value.

The Light-Six upholds Studebaker's 71-year reputation for honest power to satisfy the most exacting owner.
