

J. C. Hartley Surprised On Birthday

Two Veterans of 1st Oregon Cavalry Meet After 60 Years
J. C. Hartley of this city was very agreeably surprised Friday when a number of old friends and relatives came to help him celebrate his 80th birthday anniversary...

Old Comrades Meet
One of the most pleasant reunions was that of Judge William Colvig of Medford and Mr. Hartley. These two had served together in Co. C. First Oregon Cavalry...

The Prairie Wife" Is "Old Homestead" of West
"The Prairie Wife," a Hugo Ballin production for Metro-Goldwyn-Mayer, which is at the Liberty on Sunday, Monday and Tuesday...

Sam Rafferty of above Mountain-dale was greeting friends in town yesterday.

The marvelous beauty of the silent vast spaces of the frozen Canadian northland is the background for the massive Metro spectacle, "The Eternal Struggle," which is coming to the Liberty Theatre tomorrow and Saturday...

The "Japanese" Ice-Cream Social

You will be introduced to the "Land of the Rising Sun" when you attend the ice-cream social at the Christian Church Friday, July 24. A free program will be given in the church, by the Oratorian club followed by the procession out into the Garden. The Emperor and Empress of Japan will lead the way in all their dazzling pomp and glory. The program begins at 7:30. The social is given under the auspices of the young people's C. E. society.

Camp Ground Correction

A line thrown into the wrong position from the linotype put a different light on a story than was intended. The story should have read—Five auto camp grounds have passed the requirements and been approved by County Health Officer Dr. L. W. Hyde. The camps approved are Hillsboro Municipal camp grounds, Rippling Waters, Gib's camp ground, Jurgens on Sherwood road and Soda Springs. One other camp was not acceptable and it was not willing to conform to the regulations and was closed by Dr. Hyde.

Hop Growers May Have Another Pest

Experiment Station Advises On Red Spider Which Is Worrying
Oregon Agricultural College, Corvallis, July 15—Hop growers who have been directing their sprays against the hop aphid already this season may have an additional pest to combat in the red spider, due to the hot weather, report the authorities for the experiment station. No control measures have been applied against the red spider this season so far, but some growers have already sprayed twice for hop aphid and may have to spray again.

A combination spray to control both pests has been shown to be practical. The formula for the spray is commercial concentrated lime-sulfur, 2 gallons; calcium caseinate, 1 pound; sulfur (sublimated or dusting sulfur), 5 pounds; nicotine sulfate, 6 ounces; and water to make 100 gallons.

The powdered caseinate and sulfur are first thoroughly mixed together and then water added slowly, working the mixture into a thin, homogenous paste. The commercial lime-sulfur is poured into the spray tank, and water added. As the tank is filling, the sulfur paste added is poured through a strainer to remove the lumps. The nicotine sulfate is added last, just before spraying.

"Some growers obtained good results last season without adding the sulfur," says the station. "If this practice is followed, be sure to add the calcium caseinate to the tank after it is full and then add the nicotine just before spraying. In place of the calcium caseinate, one-half pound of hydrated lime added to one gallon of skim milk can be used.

"Growers who use quassa to control the aphid can combine their spray with lime sulfur in the same way as the nicotine. Soap is not necessary to use when the calcium caseinate spreader is used, and soap should not be combined or used in sprays that contain lime-sulfur.

"Some growers obtained good results last season without adding the sulfur," says the station. "If this practice is followed, be sure to add the calcium caseinate to the tank after it is full and then add the nicotine just before spraying. In place of the calcium caseinate, one-half pound of hydrated lime added to one gallon of skim milk can be used.

Labor Surplus Is Slowly Decreasing

Medford And LaGrande Only Two Cities To Report Surplus Of Workers
Following is report according to districts or localities of seasonal employment conditions in Oregon: Portland—Building construction, road work and highway construction, together with demand for seasonal workers have absorbed all surplus labor. Some scarcity of seasonal workers in berry picking, which is now at its peak. At least ninety percent of the fir sawmills along the west coast have resumed cutting after the briefest Fourth of July shutdown in three years. Corvallis—There is neither a shortage nor surplus in this section. Haying is in progress and it is anticipated that local labor will be sufficient to handle the crop. Eugene—There is a strong demand for all kinds of labor, especially has been true of farm hands, laborers on road work and common laborers on the Natron Cut-Off. Demand for hay hands and loganberry pickers. Gresham—The berry harvest at Gresham is well advanced, with some scarcity of pickers. There is a large acreage of cucumbers in this vicinity. Picking will begin sometime in August and continue until killing frosts. Local help and workers from Portland will probably be sufficient to handle the crop. LaGrande—There is a surplus of labor in lumbering and farming industries. Haying is now in progress with ample labor to handle. McMinnville—There is no shortage of labor at this time. Haying is in progress, berry picking closing. Medford—There is a surplus of labor at this present time. About the middle of August the pear picking season will start and there will be a great deal of work at that time. Believe we will be able to handle the crop with the present labor supply. Pendleton—There is neither a shortage nor surplus of labor. Harvest has started in the lighter lands, and indications are that more labor will be needed as the season advances. Salem—Scarcity of seasonal workers in berry fields. There is a strong demand for construction workers and harvest hands in the hay fields. The Dalles—The supply of labor is about equal to demand. Hay harvest is on, using about all the surplus labor. It is safe to say that as soon as the grain harvest begins which will be between the 10th and 25th of this month there will be a shortage of help.

"The best worker on the ranch"
"Yes, sir, that old Ford hasn't soldiered a day since I took to using this new Zerolene 'F' for Fords."
Ford owners who "tried out" Zerolene "F" for Fords when it was first put on the market have been sticking to it ever since. Zerolene "F" for Fords is made by the Standard Oil Company's patented vacuum process. It lubricates all the bearing surfaces where oil is needed, especially the wrist-pin bearings and the upper half of the cylinder walls, which are frequently "oil-starved" when an unsuitable lubricant is used. The result is improved gasoline mileage, quicker starting and increased freedom from carbon and other motor troubles. A Ford is an A-1 transportation investment. Protect your investment by proper lubrication. STANDARD OIL COMPANY (California) For FORDS

Southern Pacific Save 5c a mile!
-it's worth saving. Costs about 7c a mile to drive the old bus. Costs only about 2c a mile (commutation fare) to ride the Red cars. Get on the Red electric and put a nickel in your pocket at every mile-post. Comfort, speed, and reliability, too. Southern Pacific Line Red Electrics

Never Before a Value Like This
The Super-Six principle exclusive to Hudson and Essex, is responsible for the largest selling 6-cylinder cars in the world, because it gives results in smooth, brilliant action, reliability and economy never attained by any other type. This Essex, in all ways, is the finest ever built. Easier riding and driving, more flexible in performance, handsomer in line and finish, it is also lower in price than ever before. ESSEX COACH \$850
Freight and Tax Extra
HUDSON-ESSEX WORLD'S LARGEST SELLING 6-CYLINDER CARS
