THE TAXPAYER SQUEEZE

A foxy gazabo named Dan Has fixed up a slick little plan— A taxpayer squeeze The "housewives" to please— But work it I doubt if he can. With fifty-three millions to spend, He'll borrow much more if we lend; He'd bankrupt the state And not hesitate To sell us all out in the end. The scheme of this Kelleher man Resembles the ostrich's plan, Who stuck his small head In the sand as he said: "Discover me now if you can!" Forgetting the owl in the tree. (The wise birds like you and I like me) He hands us a hunk Of political bunk But knows what the answer will be —November Second.

Direct From the Factory To You? 'Tis a Long Road With Many Tolls

Of all the gastly frauds that have cost the American public hundreds of thousands of hard earned dollars one of the greatest is the cry, "Direct From Factory to Consumer."

Direct! How Direct? Direct to a state manager who takes a toll sufficient to pay any warehousing costs he may have to incur—sufficient to pay the office rent, help and the cost of building a field force of salesmen.

Direct from the state manager to the District Managers who take their toll sufficient to cover expenses and leave a profit.

Direct from the District Manager to the Bell Ringer whose profit is usually the amount of the deposit fee required.

Truly the route direct from the factory to you is a long road of many tolls.

Are profits big in the Peddler Field? Just secure a copy of the "Specialty

Salesmen" Magazine and see what these peddler firms say themselves.

Are costs high in the Peddler Field? A well known shoe firm in Chicago tried selling its shoes by canvassing and found that peddler selling was far more costly than selling from their stores in the regular way.

The bare, bald, plain truth is that all the Peddler's talk about saving you money is sheer bunk. His costs run so high that the ordinary firm would go broke from just one item that the peddler's firm meets among many other high costs. We refer to the cost of hiring and training its sales force, which Mr. T. K. Kelly, banker, sales authority and president of the T. K. Kelly Sales System, Minneapolis, Minnesota, declares will cost from 100 per cent to 150 per cent higher than the same item does in the regular channels of distribution.

Yes—it's safer to spend your money at home.

THERE is a word often used by economists. That word is "utility." When you buy merchandise you pay for three utilities. You pay for form utility, time utility and place utility. Form Utility is given by the manufacturer who takes raw goods and puts them into the form and condition—contrives from them the article that you can use. Time Utility is given by the wholesaler who pays for transporting that article to the general district where such goods are needed and then stores it until such time as his retail customers have a demand for it. Place utility is given by the retailer who anticipates your wants by having it here at hand so that instead of traveling long distances to secure this article you have it right at hand without the expense of delay or trouble on your part. These utilities are eternal. Not one of them can be dispensed with and they must be paid for. The only difference is that the Peddler handling a specialty must charge you more for delivering these three utilities than the old established chain of manufacturer, wholesaler, retailer has to charge. That is due to the Peddler handling one specialty where the cost must fall heavier than where the cost is apportioned over a mass of merchandise of many different lines. Moreover the Peddler is not equipped to deliver these utilities at a minimum cost.

SKAGGS Cash saving UNITED STORES stores Distribution Without Waste IT WILL PAY YOU, TOO

One of the secrets of the success of Skaggs Stores—and it is no secret at all—is the fact that we buy in almost unbelievable large quantities. Manufacturers are glad to quote us the lowest possible prices because we pay cash and—in many cases—take the entire output of their plants. In this way we effect enormous savings which, in part, account for the low prices you always find in our stores. The same practices that have paid us will pay you. It is easy enough to figure out your needs ahead of time and buy a week or a month's supply while you are at it. On canned goods, for instance, you can make big savings by buying half-a-dozen, a dozen or more cans at a time. The same thing applies to all of the staple, non-perishable products—it pays to buy them in quantities. Try it and see.
