**Value of Newspapers Recognized**  
A. A. Anderson, secretary of the Pacific Coast Building-Loan association, in an address at the Pacific States Saving and Loan conference, recommends newspaper advertising as the most effective and economical means of reaching the public. Further, he urged that the building and loan associations throughout the United States should have a fund of at least \$1,000,000 for such a campaign.

As Mr. Anderson knows, it has been fully demonstrated that the newspaper stands by itself as a carrier of messages to the greatest possible number of people. It is the only medium that is sure to reach the citizens of a community and be read. This fact is being more fully appreciated every day.

The smaller city dailies and the country weeklies are the great medium for reaching the masses of the people who represent the majority of the reading and buying power of this nation.—Manufacturer.
