"James W. Mott of Astoria, candidate for congress from the First Oregon district, is one of Oregon's brilliant legislators. He has an unusual record of accomplishment. He has been the author of some of Oregon's most important legislation."—Oregon Journal (Portland), May 7, 1928.

As a state legislator since 1923 he has the unique record of having secured by his own bills, the passage of every piece of legislation, without exception, in which his district has been interested.

This District Is Entitled to a New Deal

The Congressional Record shows conclusively that we have been virtually without representation in the lower house of congress since the incumbent was elected 21 years ago, and that we have received from that body none of the legislation we are entitled to.

position to the coast counties. Yamhill and Washington counties each have a senator.

My continuous residence in Yamhill and Tillamook counties for the past forty-eight years, combined with my experience in the House in 1919 and 1923 and in the Senate in 1921 and 1923, gives me a knowledge of the needs of the district and of legislative problems which will be valuable in this position.

If nominated and elected, I will support such measures as are required for the advancement of the necessary activities of the state, keeping in mind that any provisions made for such advancement must be consistent with the state's ability to pay. Also, I will give assistance to what seems to me the best plan offered to produce a more equitable distribution of the tax burden of

## Enduring as Torrey Pines

Use Cycol and avoid frequent valve-grinding. This oil with "endurance beyond belief" reduces carbon trouble.

**Stability** The new Cycol will stand the hardest kind of usage. It is refined to meet the severest conditions of heat and pressure developed by the modern high compression engines, assuring you an unbroken oil film where heat, pressure and friction are greatest.

**No Acids** The new Cycol refining process eliminates the use of acids, though most refiners use them. While acids clear the "crude oil" they chemically change its structure and composition, thus seriously cutting its lubricating value.

The new refining process for Cycol is different in every respect. It selects from the "crude" those elements of greatest lubricating value and stability in performance, rejecting at the same time those elements which readily break down under engine heat and cause excessive carbon deposits.

So Cycol gives a protective oil film on cylinder walls and moving parts, not vapor at the breather pipe.

**Less Carbon** As to carbon, Cycol like all other oils deposits some carbon. But it deposits less carbon than any other oil. The most exhaustive tests have proven that statement.

And even more important, the carbon that is deposited by Cycol is soft and easily removed. It is not hard or sticky and cannot scratch a cylinder.

**Prove it Yourself** For these reasons you will find that Cycol gives you the finest results you have ever known— a more perfect lubrication, "endurance beyond belief" and the elimination of carbon troubles.

So fill your crank case with Cycol. You can identify it by the new transparent green-gold color.
