what is **Good Feed?**

Experiments have proven very conclusively that it is not necessarily the amount of feed consumed that results in profitable production, but rather the necessity of having a properly balanced ration. Good, Clean, Wholesome Grains, properly milled and blended with predetermined quantities of Oil Meals, Concentrates and Minerals, and fed regularly, certainly will produce satisfactory results. So, whether feeding Laying Hens, Calves, or Milk Cows, Pigs or Fattening Hogs, or whether it is for Rabbits, there is an especially prepared ration that can be fed more profitably, and it costs little, if any, more than the ordinary mixture.

"FEED" is our business—Experienced field men are at your service, and discussing feed problems with them places you under no obligation to buy. Make free use of this service.
