

Class from State College Visits at J. Van Kleek Farm

Kinton, Oct. 4.—Professor Roy Jones of Oregon State college was at the J. Van Kleek ranch last Friday with a class of eight boys from the college who he is training in stock judging. Seven members of the local club were present.

Mr. and Mrs. Ben Kershaw, who were residents of this town for many years, but now reside in Tigar, spent a few days last week with some of their old neighbors and friends. They returned to their home Sunday evening.

William Wenzel attended the state fair Saturday.

Mr. and Mrs. L. L. Chambers and family and Mrs. E. L. Cox were Beaverton callers Wednesday.

Misses Alma and Gladys Sellers of Huber and Paul Langer of Beaverton were visitors last Sunday at the home of Mr. and Mrs. C. Vandermost.

Mrs. Anthony Schulte was in Portland Saturday.

Mr. and Mrs. Harold Cutting spent Sunday with Mrs. Cutting's parents, Mr. and Mrs. Fred Brown of North Plains.

Mr. and Mrs. A. Hansen of Baker, and Mr. and Mrs. J. Valentine of Portland were Sunday guests at the home of Mr. and Mrs. H. J. Valentine.

Mr. and Mrs. Ben Kershaw of Tigar attended the session of the bible school Sunday morning.

Misses Ida and Rosa Bucher of Portland spent Sunday with their parents, Mr. and Mrs. F. A. Bucher.

Mr. and Mrs. O. B. Kraus and family and Mr. and Mrs. Emil Ficken and family of Tualatin, were calling on friends and relatives here Sunday.

Mr. and Mrs. Anthony Schulte have traded their 20-acre tract on Cooper Mountain for the Belmont apartments, managed by Mr. and Mrs. C. J. Daily, in Portland. It is understood Mrs. Daily's brother and family will live on the Schulte ranch.

H. Pomeroy, William VanLoh, Everett Wright and E. L. Cox attended the meeting of Hillsboro encampment, I. O. O. F., Friday evening. Mr. Pomeroy was initiated into this branch of the order.

A few friends of Mrs. Anthony Schulte gave her a farewell party Tuesday afternoon, as she is soon to move to Portland to make her home. Mr. and Mrs. Schulte have made their home here for a number of years.

Regular meeting of Kinton grange will be held at the hall this Saturday evening at 8 o'clock. It is expected there will be work in the third and fourth degrees.

Dr. Samuel Sorenson of Beaverton was in town Wednesday.

Mrs. L. S. Bierly and daughter, Mrs. Ethel McCormick, of Hillsboro, were at their home here last Tuesday.

Coyotes are again giving the farmers who have sheep a lot of trouble. J. J. VanKleek, A. B. Flint and Ed Rood have lost a number in this way during the past week.

Regular preaching service by Rev. W. L. Strange will be held at the church Sunday at 11 a. m. Bible school at 10 a. m.

Art Committee Will Meet With Scholls

Scholls, Oct. 4.—The Art committee of the County Federation will meet with the Scholls Woman's club on October 12 at the home of Mrs. F. E. Rowell. A pot-luck luncheon will be served at noon.

Several members were initiated into the new Singletree club at the Grange hall Friday evening.

Mr. and Mrs. T. C. Anderson and son of Portland visited at the F. E. Rowell home Sunday.

C. R. Adams spent the week-end at Newberg with his daughter, Mrs. Hutchins, and family.

Earl Kuhl and family of Portland were dinner guests of Mr. and Mrs. Wohlschlegel Sunday.

Mr. and Mrs. George Allison and sons spent Wednesday evening with Mr. Allison's sister, Mrs. Victor Kindt, and family, of Portland.

Mr. and Mrs. A. W. Walker of Hillsboro spent Sunday with Mr. and Mrs. J. B. Bartlett.

Mrs. Magnuson of Canby is visiting with her son, J. A. Magnuson.

The following people from here

were at the state fair: Mr. and Mrs. Russell, Ray Jaquith and family, Mr. and Mrs. L. M. Hesse, Mrs. Farver, C. R. Adams, Arthur Hitchcock and L. M. Miller.

Mr. and Mrs. Frank Eckes recently visited at the William Hansen home.

Mrs. Fred Aebisher and Mr. and Mrs. Dunsmoor of Portland attended the Woman's Missionary Oratorical contest at Lafayette Sunday evening.

Mr. and Mrs. Don of Middleton were Sunday guests at the Art Larkin home.

Mrs. Ray Moore entertained her Sunday school class Sunday with a chicken dinner. Nine were present.

Leslie Howell of Liberty Bond, Wash., returned to Scholls Saturday.

The Ladies' Aid society will meet at the church Friday afternoon.

Mr. and Mrs. Virgil Bish and Carl Rueck were guests at the Frank Miller home Sunday.

Miss Jennie Hall of Lincoln, Nebraska, visited at the L. M. Hesse home last week.

Mr. and Mrs. Gabel (Marjorie Tower) spent Sunday with her parents, Mr. and Mrs. Tower.

Mrs. Frank Hansen of Midway was called to Pendleton on account of the illness of her mother.

Frank Hansen's father, who has been ill in Portland, has returned home much improved.

Ruth Meyers, who was in a Portland sanatorium, is at home and is improving.

Mrs. Marshall Baker and son, Earl, visited Mrs. Elizabeth Reed Monday.

James H. Moore is ill.

Contagious abortion is being eradicated in many Oregon dairy herds. One tested and disease-free cow shown at the state fair this year by the experiment station was the daughter of a cow that aborted four times, as did her mother before.

This cow was an aborted calf at 254 days, yet by being raised away from her ancestors she has remained disease free and given birth to eight normal calves.

New Periodical Is Introduced by Plane

Perhaps no more unique and appropriate method of introducing a new periodical has been devised than that now being utilized by the Macfadden Publications, Inc., in connection with their new magazine "Flying Stories," the first issue of which will appear on October 23.

Being a magazine of fiction, romance and adventure with a background of aeronautics in its various phases, it is entirely fitting that word of its coming should reach the distributors in the big selling centers by plane. Accordingly, one of the first subjects discussed upon each landing by J. E. Williamson, sales promotion manager for the Macfadden organization, who is now touring the country in the company's big Lockheed-Vega monoplane, is the coming of the new flying magazine, a publication for which Macfadden Publications, Inc., feels there is a large public demand.

A sort of combined "Message to Garcia" and Paul Revere's ride, the individuality of this manner of announcement makes a notable impression wherever the Macfadden representative drops down out of the sky.

Contagious abortion in cattle presents a serious problem not only in the health hazards offered to the consumers of raw milk, but also in the tremendous loss in dollars and cents to the dairy industry of this state. Dr. W. H. Lytle, state veterinarian, estimates that from five to ten per cent of the herds in the Willamette valley are infected with the germ causing contagious abortion, and that the loss to the dairymen is easily over one and a half million dollars annually.

Undulant fever has often been mistaken for typhoid fever, particularly where the disease has been of a mild type. Danish authorities assert that there are more cases of undulant than typhoid fever in Denmark. The number of cases of undulant fever has increased remarkably in the United States in the past year because of correct diagnosis of the disease.

The chief symptoms of the disease are loss of appetite, loss of weight, marked weakness, headache, chills, fever, profuse sweating, and frequently pain in the joints. The average duration of the illness from the onset to convalescence is three months, but cases lasting a year or longer are not at all rare. The mortality is very low. The germ may be found in the blood stream

Undulant Fever Is New Oregon Disease

There have recently come to the attention of the State Board of Health several cases of undulant fever, a disease hitherto unknown, or at least unrecognized, in this state. The term undulant is applied to this disease because it is characterized by waves of fever lasting a week or so alternating with periods of several days when there is little or no fever. Undulant fever is also known as Malta fever because the disease was first observed on the island of Malta in the Mediterranean Sea. There, as well as in other parts of the world

where Malta fever occurred, human infection was traceable to the use of goat's milk. In this country undulant fever has been largely contracted by the use of milk from cows that had prematurely lost their young, a condition known as "contagious abortion." The few cases discovered in Oregon drank milk from cattle that were known to have aborted. The germ causing Malta fever, Bacillus Melitensis, can be distinguished only with the greatest difficulty from the germ causing contagious abortion, Bacillus Abortus.

Contagious abortion in cattle presents a serious problem not only in the health hazards offered to the consumers of raw milk, but also in the tremendous loss in dollars and cents to the dairy industry of this state. Dr. W. H. Lytle, state veterinarian, estimates that from five to ten per cent of the herds in the Willamette valley are infected with the germ causing contagious abortion, and that the loss to the dairymen is easily over one and a half million dollars annually.

Undulant fever has often been mistaken for typhoid fever, particularly where the disease has been of a mild type. Danish authorities assert that there are more cases of undulant than typhoid fever in Denmark. The number of cases of undulant fever has increased remarkably in the United States in the past year because of correct diagnosis of the disease.

The chief symptoms of the disease are loss of appetite, loss of weight, marked weakness, headache, chills, fever, profuse sweating, and frequently pain in the joints. The average duration of the illness from the onset to convalescence is three months, but cases lasting a year or longer are not at all rare. The mortality is very low. The germ may be found in the blood stream

and in the urine. In suspected cases blood for the agglutination test should be submitted to the State Hygienic Laboratory. All cases of undulant fever should be reported to the State Board of Health. The patient should be kept in a modified quarantine. Discharges should be disinfected, and all sanitary precautions employed in the control of intestinal diseases should be applied to undulant fever.

The existence of undulant fever in Oregon is another argument for the pasteurization of milk. In rural communities where the pasteurizing plants are not available, milk from infected cows should be boiled before drinking.

Peach leaf curl is peculiar in that there is only one infection period during the year, says H. P. Bars, plant pathologist at the experiment station. This is the period when the buds break in early spring. Hence one thorough spraying with bordeaux mixture 4-4-50 during December or January will kill the spores in plenty of time.

Overflow land is not well suited for Ladino clover if the water stands on it for a considerable period of time, finds the experiment station. If the overflow is for short

periods only or if the water is continuously moving it is usually safe. A good indicator is whether or not the soil will produce normal growths of the ordinary small Dutch clover.

Hillsboro Argus—\$1.50 per year.

TOOK SODA 20 YEARS FOR GAS—STOPS NOW
"For 20 years I took soda for indigestion and stomach gas. One bottle of Adlerika brought me complete relief."—J. B. Hardy.

Adlerika relieves stomach gas and sourness in TEN minutes. Acting on BOTH upper and lower bowel, it removes old waste matter you never thought was in your system. Let Adlerika give your stomach and bowels a REAL cleaning and see how much better you feel. It will surprise you! Hillsboro Pharmacy.
