Income Is Wealth—Tax It

No matter how big or fertile a farm may be, unless it makes an income it has no value — and will not have until it does.

Yet, farms that earn \$1,000 a year are taxed \$400, while many business enterprises having only a few desks and typewriters and an automobile or two earn many thousands—and pay no tax.

When part of the people pay all the tax, why shouldn't their taxes be high? Vote for the income tax.
