## McMormick-Deering Spreaders for Good Work

The time and labor you save by using a McCormick-Deering spreader amounts to cash equivalent to a substantial payment. The increased crop production you can get by spreading manure evenly and thinly over more acres will lower production costs so much that you cannot afford to continue hand spreading.

The patented widespread spiral on the McCormick-Deering accounts for the exceptionally wide spread. It is never necessary to drive over freshly spread manure.

The light draft of McCormick-Deering spreaders increases their durability and makes possible spreading full-capacity loads without overloading teams. Their durability extends the purchase price over years of continuous usage.

4.

Now is the time to spread manure and today is the day to ask us for prices.
