HILLSBORO, OREGON, THURSDAY, SEPTEMBER 7, 1933

State Capitol News Letter

BY A. L. LINDBECK Question of Special Session

Legislature in Doubt; Reunion Delayed

Salem-Most every one seems to be agreed that something ought to done about the unemployment situation. At that point, however, agreement ends. Many believe that the problem can only be solved by the legislature. Others, notably State Treasurer Holman, are of the opinion that the problem is largely local and should be handled by the several counties rather than

Even among those who pin their faith on the legislature there is violent disagreement as to the cure. Earl Snell, speaker of the house and ardent advocate of the sales tax at the regular session, now proposes bond issue backed by a beer tax. Ray Gill and his grangers recommend a bond issue based on de linquent taxes. A few die-hards in the old sales tax camp are still unconvinced that the people really meant what they said when they turned down that source of revenue last July and still cling to this measure as the only way out. Othanticipating early repeal of the eighteenth amendment and unrestrained sale of hard liquor as well as beer, want to float out of the dilemma on a liquor tax.

Governor Meier's action in appointing a committee to "get to-gether" on some feasible and ac-

Hilhi Grid Squad Ag Program To Benefit

Allotment in County Totals \$29.76 for Every Acre Vacated in Plan

Districts are Formed

Reduction of 15 Per Cent of Average Crop Required

(By Wm. F. Cyrus, County Agent) Benefit payments to Washington county farmers on the 1933 wheat crop, when figured on the basis of nent for land taken out of wheat production will average \$29 .-16 for each acre vacated. Payments are made upon allotments which (there) are 54 per cent of the average production for the years of 1930, 1931 and 1932.

Washington county has an of-ficial allotment of 350,125 bushels which is 54 per cent of an average annual production of 648,347 bushels With a payment of 28 cents per bushel this means that \$98,035 is available to wheat growers of the county on the 1933 crop if they all take advantage of the figure of 15 per cent has been set as the reduction to be required and this would mean reducing by 3294 acres
