### Banks Teacher Returns Home after Extensive Motor Trip

(By Mrs. Fred Wolford)  
BANKS—Miss Moxie Hopkins returned to her home in Banks Thursday after an extended motor trip through the United States, Mexico and Canada. Miss Hopkins was in a group which included Miss Venita Rains and Mrs. Jessie I. Rains of Salem and Miss Ruth Clark of Portland. The four girls, all school teachers, made the trip of 12,000 miles in ten weeks, most of the time they stopped at tourists' cabins. The trip was made leisurely and the girls returned with scrapbooks and many pictures. They left Salem June 7 and journeyed south through California and into Mexico, then eastward through the southwestern gulf and southeast states up the east coast and on into Canada at Montreal. They drove down the Canadian side to Niagara Falls and returned to the states, then drove around the Great Lakes and on to Chicago, where they visited the Century of Progress fair and thence down to St. Louis and Kansas City. The girls then crossed over to Denver and Salt Lake City, and north to the Yellowstone National park, and thru home points of interest in thirty-two states were visited, also Tia Juana and Juarez, Mexico, Montreal and other Canadian towns.

Historical places which were visited were the missions, old French quarters in New Orleans, Gettysburg, Mt. Vernon, Lexington, Plymouth, Fort Bridger, Independence hall, old South church, and many other places.

The girls were very much interested in visiting different colleges on the way. Those visited were Stanford, University of California, University of Southern California, Mills college, Tulane, Yale, Harvard, Brown, Fordham, Temple, Johns Hopkins, Notre Dame, Columbia, and University of Pennsylvania.

One of the most interesting things of the south was the negro living quarters in Birmingham. The hottest weather was experienced in Missouri and Kansas. Kansas with 96 degrees at 2 a. m. a night. The trip across the Mojave was made during a spell of cool weather. Cool, comfortable weather was experienced all through the south, but with many electric storms. The most thrilling weather experienced of all was a cyclone in Illinois. They arrived in Denver, Colo. in time to see the effects of the cloudburst there. In eastern Oregon they traveled through a dust storm, Kansas and Missouri were the driest states through which they passed. Mile upon mile there they saw no vegetation whatsoever, not even a leaf on a tree. What vegetation there was had dried up and blown away.

The girls found good highways most of the way, the poorest roads being in New Mexico and parts of Alabama. Oregon's highways are as good as were found anywhere.

Tourists' cabins and accommodations were found to be better and more reasonably priced in the west than in the east.

Being teachers, the girls naturally noticed the public school buildings. The rural schools of the east were found to be very poor in appearance and equipment compared to the best little buildings of the west. Very few of them had playsheds or playground equipment of any kind.

Mexico or playsheds is the primary teacher of the Banks grade school.

Banks Folk Marry

### LEARN THE ADVANTAGES OF OWNING AN AUTOMATIC WATER SYSTEM

Good slogans are based on knowledge of a product and its merits. Visit a dealer's showroom and ask him to give you full facts about electric water systems. It will help you write a winning slogan!

● An automatic water system is one of the most desirable improvements that can be made on any farm. It supplies an abundance of water ON TAP day and night. It eliminates the drudgery of pumping and carrying water. It aids in the health of the entire family because it supplies clean, protected water and an abundance of it for baths, laundry, and cooking. It provides plenty of water for your livestock—and that means much, both to the dairyman and the hog raiser. An automatic water system is one of your best protections against fire!

As to cost, modern systems are inexpensive and can be purchased on easy terms. Thousands of tests prove that electricity to operate these systems costs 1 to 2 cents per day. So, in addition to being one of the greatest conveniences available to farm homes today, it is also one of the most economical improvements that can be made, considering the long years of enjoyment and freedom from drudgery it will bring.

Visit any store selling electric water systems and learn first-hand how truly efficient and economical they are. THE FACTS WILL SURPRISE YOU.
