Kinton Man Has Good Ad Results

Many more plugs could have been sold off an advertisement run in the Argus by S. H. Pomroy of Kinton if he had had a larger supply. A small classified ad in the great market place of Washington county—the Argus—brought immediate results. He sold his pigs the day the paper came out and had many calls after they were sold. Reading and use of the advertisements in the Argus is a thrifty move on the part of many people and it pays for their subscription many times over every year.

his way, holding companies and other Wall street schemes will be curbed, but this administration will build no more Tennessee valley authorities. Wish there were more like him at Washington.

Well it is good to hear that business is better. The Babsonchart shows an increase of 14 per cent over last year and is now only 18 per cent below normal. Everybody here seems to feel encouraged. I will soon be in beautiful Southern California, but do not forget this is a great country out here. Although Wallace has plowed under much cotton, the political crops are bigger than ever!

Senator Long Seen as Political Factor

(Continued from page one) ly supplying funds to Huey Long Father, Coughlin, and Dr. Townsend at this time. Wall street would be building up a real hedge. If the radicals should be elected, they would be on the inside; while the radicals run but are not elected, there would be a republican victory—at least this is the way they figure.

Texas May Yet Rule America
Texas is not only the greatest state in area, but it is fast becoming the seat of political power. We must not forget that John Garner is still vice-president. During the past two years, John has been largely an ornament. Conditions, however, are rapidly changing. The defeat of the world court and other recent events in Washington are now causing the White House to send out for John Garner. If anything should happen to President Roosevelt—an ever present possibility—then John Garner would be president. In this case the brain trust and about ninety per cent of the New Deal would go out the window "like a bunch of turkeys." They say that John might enlarge the pipe line connecting the treasury at Washington with Texas; but that he would rip up the pipe lines to all other states.

Right now another Texas—Jesse Jones of this city—is perhaps the most trusted man in Washington. The Reconstruction Finance corporation—which is Jesse Jones—is the one member of the New Deal alphabet (RFC) which everyone respects. (This, by the way, is the only one of the New Deal outfits

which was not a creation of the brain trust). Jesse Jones is a life-long democrat. He is a man of affairs, being perhaps the largest real estate taxpayer in Houston. He is honest, modest, kindly, and yet very shrewd. He would make a great president. Today he should be the secretary of the treasury. So with John Garner and Jesse Jones and others whom I might mention, Texas may again rule America.

Watch Marriner Eccles
As I speed across these wonderful plains and head toward Utah, I think of the new chief of the federal reserve system, Marriner Eccles. Here is a man worth watching. He is looked upon by bankers as a radical, but he is a true friend of progressive conservatives. He does not believe in a central bank, but he does believe in one federal reserve system instead of twelve, and in close co-operation of the federal reserve with the federal treasury. He believes that present unemployment is due to the lack of credit and "check money," yet he does not favor printing pre-currency.

Eccles believes in the lavish use of government credit; but he believes in getting these funds to consumers' hands rather than having the government get into business. Eccles is a good friend of every progressive employer and corporation—and this includes honestly operated utilities. If Eccles has to all other states.

The Outstanding 3-Plow Tractor

McCormick-Deering W-30

THE new McCormick-Deering W-30 tractor stands head and shoulders above any other tractor of its type. It is different in that it has new types of seals which keep water, mud, dust, and other abrasive materials from getting into the operating parts. It has a ball-bearing transmission. Steering is made unusually easy through the use of roller bearings at the bottom of each steering-knuckle pivot pin and on the steering shaft just above the worm gear. In all, there are 34 ball and roller bearings in the W-30.

The engine features replaceable cylinders, hard exhaust-valve seat inserts, and provides abundant power to pull three plow bottoms under average conditions.

These are just a few of the outstanding features that make the W-30 the best buy on the market. Stop in and see this tractor or ask us to demonstrate it.

"I Never Read the Advertisements"

You know this person. He thinks he is telling the truth. But quiz him and he will recite the make of his motor-car, his hat, his shirt, his suit, his shoes, his tooth paste, his towels, adinfinitum . . . with accent on the "ad." In other words, they are all advertised products.

Why, he could no more escape the presence and the power of the printed word than he could evade eating or sleeping. The advertisements are a definite part of contemporary American life. Their messages are vital to daily existence. They have a definite association with the pocketbook, than which there is nothing more intimate and personal.

The important thing is not merely to "read the advertisements," but to read ALL of them. The one advertisement you "didn't see" may contain information you would have given a great deal to possess. Certainly, it is as important to you to know that Smiths are having a sale of sheets or shirts, as to read that Congress will hold a special session!
