

### Schedule Set Sunset Loop

#### Bill Joos Named Manager of Hillsboro Team

First local game on the 1935 Sunset baseball league schedule is slated for April 14 when the Hillsboro team clashes with Aloha on the home diamond. The schedule of games for the entire season was released this week by league members.

All teams have been strengthened, especially the weaker teams of last year, according to League President Clinton. Leaders of the various teams this year are: Bill Joos, Hillsboro; Roland Watkins, Tualatin; Lewis Garfield, Oreno; Ole Olson, Cornelius; Ted Emerson, Aloha; George Schler, Banks; Arnold Strifefer, Gaston; and W. H. McNay, Laurel.

Schedule is as follows:

- First Half**
- April 7—Oreno vs Tualatin, Gaston at Aloha, Laurel at Cornelius, Hillsboro at Banks.
  - April 14—Cornelius at Oreno, Tualatin at Laurel, Aloha at Hillsboro, Banks at Gaston.
  - April 21—Laurel at Aloha, Gaston at Tualatin, Hillsboro at Cornelius, Oreno at Banks.
  - April 28—Aloha at Oreno, Tualatin at Hillsboro, Cornelius at Gaston, Banks at Laurel.
  - May 5—Hillsboro at Laurel, Oreno at Gaston, Tualatin at Cornelius, Aloha at Banks.
  - May 12—Banks at Tualatin, Cornelius at Aloha, Gaston at Hillsboro, Laurel at Oreno.
  - May 19—Aloha at Tualatin, Hillsboro at Oreno, Gaston at Laurel, Banks at Cornelius.
  - May 26—Open for all teams to play postponed games.
- Second Half**
- June 2—Tualatin at Aloha, Oreno at Hillsboro, Laurel at Gaston, Cornelius at Banks.
  - June 9—Oreno at Laurel, Hillsboro at Gaston, Aloha at Cornelius, Tualatin at Banks.
  - June 16—Gaston at Oreno, Laurel at Hillsboro, Cornelius at Tualatin, Banks at Aloha.
  - June 23—Oreno at Aloha, Hillsboro at Tualatin, Gaston at Cornelius, Laurel at Banks.
  - June 30—Aloha at Laurel, Tualatin at Gaston, Cornelius at Hillsboro, Banks at Oreno.
  - July 7—Oreno at Cornelius, Laurel at Tualatin, Hillsboro at Aloha, Gaston at Banks.
  - July 14—Tualatin at Oreno, Aloha at Gaston, Banks at Hillsboro, Cornelius at Laurel.
  - July 21—Playoff between winners of first and second halves.

### FISH IN THE DIET

As the Lenten season is here we find the markets stocked with many varieties of fresh fish. Fish is considered one of the low-cost foods, because in most localities fish of some kind are likely to be cheap at any time of the year. Fish is high food value too, which means more than being a mere item for low-cost meals.

Along with other animal foods, fish is a protein food. It is rich in minerals, and salt water fish and shell fish furnish iodine, which is important in sections where the soil and water are poor in this mineral. A number of varieties of fish, as salmon, halibut, cod and herring, have been found to be good sources of vitamins A and D. It is well then to use all of the oil from canned fish in order to retain the full vitamin value.

There are innumerable ways of serving fish. We are all familiar with baked or fried fish, but creamed or scalloped, in baked chowders, patties or croquettes it is equally delicious and are all ways of using left-over or canned varieties. Fish forms the basis of many interesting salad and sandwich combinations too. These recipes are both favorite ways of preparing fish.

**Baked Stuffed Chinook Salmon**  
2 salmon fillet  
1/2 tablespoons lemon juice  
Salt and pepper  
2-3 cup buttered crumbs  
2-3 cup cream or milk  
Mushroom stuffing.

Brush fish with lemon juice and sprinkle with salt and pepper. Put one fillet in buttered pan or on oven proof platter. Spread with stuffing, covering with remaining fillet, pour over cream or milk and bake 25 minutes in moderately hot oven (375 degrees). Sprinkle with bread crumbs and until crumbs are brown. Remove to hot serving dish and strain liquor remaining in pan over it.

**Codfish Souffle**  
1/2 cup rice  
2 cups milk  
1/2 cup salt codfish  
1 1/2 tablespoons butter  
2 eggs

Cook the rice with milk in double boiler until tender and dry. Separate the eggs and add the yolks, well beaten; add the butter and codfish, which has been freed from soaking in water. When the mixture is somewhat cool, fold in the egg whites, beaten stiff. Bake 30 minutes in moderate oven (375 degrees). Serve immediately, garnish with parsley and accompanied by a butter sauce.

**Butter Sauce:** Put 1/4-cup of butter in a bowl and work until creamy. Add 1/2-teaspoon of salt, 1/4-teaspoon pepper and 1/4-tea-

### Progress "Doubled" at Norris Dam

River waters which, harnessed by Norris Dam, will contribute untold power for future generations of southerners here offer another kind of miracle. Dam progress made on Clinch river 25 miles north-west of Knoxville, Tenn., is revealed in this picture, even if it is viewed "inside down."

### Flood Control Plan Outlined at Meeting

(Continued from page one)

stage and a corresponding amount in ordinary years.

E. A. McGrath, association president, predicted that funds would be available for flood control as soon as congress passed a bill now pending to provide funds. He declared flood control to be second only in importance to the Bonneville dam for Oregon. Other speakers included Robert M. Stewart of the U. S. engineers, Kenneth Thilston of Forest Grove, Dr. W. L. Powers and Professor M. R. Lewis of Oregon State college, J. E. Reeves of Hillsboro, L. J. Heesacker of Forest Grove route 1, R. R. Easter of Hillsboro, J. M. Pitman of Sherwood, County Agent William F. Cyrus and Len W. Guild of Hillsboro.

Present officers of the association, President McGrath, Vice-President Reeves and Secretary-Treasurer George McGee, were re-elected. W. G. Ide of Hillsboro and C. B. Buchanan Jr. of Gaston were elected to the board of directors. Other directors included Johnston, Guild, Heesacker, John Galbreath of Sherwood route 5, J. A. Irmiler of Cornelius, Pitman and F. E. Rowell of Hillsboro route 2.

**MRS. LELA M. WOODS**  
Funeral services will be held at the M. E. church at Cornelius this afternoon (Thursday) at one o'clock for Mrs. Lela Mae Woods, 36, of Blaine, who died at Cornelius Tuesday evening. Rev. C. M. Reed will officiate and Young's Funeral Home has charge of arrangements.

Mrs. Woods was born in Bridgeman, Mich., March 11, 1899, and married Earl Ray Woods March 11, 1920. During the past eight years they have lived at Blaine. She came to Cornelius two weeks ago to visit her mother, Mrs. Edith Burbank.

Surviving Mrs. Woods are her widower and two children, Lyle and Letha of Blaine; her mother, Mrs. Edith Burbank, and a brother, John E. Burbank of Cornelius.

**GEORGE E. STREETER**  
George E. Streeter died Sunday in Portland and funeral services were held Tuesday at Finley's chapel, with committal at the Portland crematorium.

Mr. Streeter was born in Illinois and came to Portland during the eighties. He had been employed in the First National bank in that city for the past 20 years. He survived by his widow, Caroline Brown Streeter, a brother, W. B. Streeter of Portland, and a sister, Mrs. John W. Bailey of Hillsboro.

**Rise in January Building**  
NEW YORK—Despite the rather severe weather conditions which prevailed during January, the volume of building permits showed a marked increase, as compared with December and the corresponding month of 1934.

**Wages Restored**  
WASHINGTON—Restitution of back wages to employees, arranged through NRA field offices and the newly organized regional compliance councils has exceeded \$3,000,000, according to figures released by the Director of Compliance and Enforcement.

Russia is meeting with considerable success in efforts to utilize the sun's rays for power and heat. Lenses and blackened boilers are used.

spoon finely chopped parsley, then 1/4-teaspoons of lemon juice very slowly.

### Solons Pass Bill County Warrants

(Continued from page one)

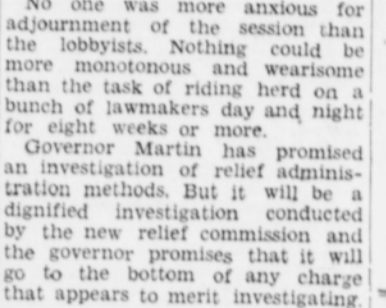

bill. The first of these increases: the tax on beer from 62 cents to \$1.30 a barrel and is expected to increase revenues from this source by \$300,000 a year, approximately \$140,000 of which will go to the cities of the state on a population basis. The free bridge bill authorized the highway commission to lift the toll charges from the five Coast highway spans, and the forest land acquisition makes provision for the purchase of timber land adjacent to forest reserves by the national government. It required the interference of Governor Martin to persuade the house to accept this measure as it came over from the senate without the tax payment provision which was insisted upon by the courts.

A number of measures still remaining in committee when the session resumed this week were dumped into the legislative scrap heap as the lawmakers cleared the desks for final adjournment. Among these was the Thomas bill increasing income tax rates and lowering the exemptions and the Martin bill which would require medical certificates from both applicants for a marriage license.

No one was more anxious for adjournment of the session than the lobbyists. Nothing could be more monotonous and wearisome than the task of riding herd on a bunch of lawmakers day and night for eight weeks or more.

Governor Martin has promised an investigation of relief administration methods. But it will be a dignified investigation conducted by the new relief commission and the governor promises that it will go to the bottom of any charge that appears to merit investigation.

**HE'LL TRY TO ROW ATLANTIC**  
In a 12-foot rubber canoe-like craft, fitted with mast and sail, Leslie William Fairnie, above, of London, Eng., plans soon to cross the Atlantic. If successful, he'll win more than \$20,000 in prize money.

### ON OREGON FARMS To Plant T. A. R. Clover for Seed

**LAKEVIEW**—The first Tennessee Anthracnose Resistant red clover to be planted in Lake county will be seeded this year by George Stockburger of the West Side community, according to Victor W. Johnson, county agent. Mr. Stockburger has obtained 200 pounds of the seed from a grower in the Willamette valley, where it has become a profitable seed crop, and plans to sow 30 acres for seed production.

**Ready to Poison Squirrels Again**  
DALLAS—A ton of poison grain for the annual battle against the squirrels has already been prepared by County Agent J. R. Beck. Mr. Beck advises putting the bait out as soon as the squirrel comes out of his winter quarters, as he is very hungry at that time. M. C. Findley has obtained 75 pounds of the poisoned barley for use on his farm in the Bethel Heights district, which Mr. Beck says is the largest single purchase of squirrel poison ever made through his office.

**Many Trees Planted in Sherman**  
MORO—Many Sherman county farmers are taking advantage of the fact that young trees of many kinds are available at the Oregon State forestry nursery at Corvallis for cost of transportation, and are planting windbreaks and shelter belts, reports Perry N. Johnston, county agent. Mr. Johnston estimates that some 15,000 of these trees will be planted in Sherman county this year. Ted Rolfe of Grass Valley is co-operating with Mr. Johnston in the planting of an acre of black locust trees to determine if it is profitable to grow these trees for fence posts.

"The American people have learned to know deceit from having met it. They have suffered too much to be intimidated by mongers of fear."—President Roosevelt.

### U. S. Government Aids Students At U. Of O.

Through an allotment of \$3250 per month, approximately 300 students are being aided by the federal government at the University of Oregon. Students are assigned work on many projects about the campus, and earn from \$10 to \$15 per month each. Work ranges from assisting with landscaping to research in various fields. Above are shown two students typing in one of the university offices, while below a group is working on the grounds under the direction of an expert gardener.

### Kansas Tornado Makes 1935 Debut

Whirling furiously toward Wichita, Kan., this aerial maelstrom of destruction, heralding the opening of the Sunflower state's tornado season, was snapped by a daring cameraman before it swept through the suburbs and reduced a group of homes and business buildings to debris.

cial emergencies it may be used against scarlet fever with one or as a control measure. At the present time it is not feasible to use immunization as a general protective measure.

A method has been devised for the concentration of scarlet fever toxin without increasing the nitrogen content. This concentrated toxin may be so detoxified that sufficiently large doses can be given to produce immunity in three doses. This detoxified toxin is still in the experimental stage, but it is hoped that it may be so perfected that it will be possible to immunize

Scarlet fever antitoxin is obtained by immunizing horses by repeated injections of toxin. The prophylactic administration of antitoxin is an emergency measure which acts immediately but cannot be relied upon to protect for more than two or three weeks. Scarlet fever antitoxin has been found valuable in the diagnosis of scarlet fever. When a small dose of the antitoxin is injected into the

## IS Advertising Read?

THE word halitosis lay buried in the widely "read" dictionary of the English language scores of years until set in ordinary type in an advertisement it became a by-word of the millions.

As a result, a product 40 years on the market with moderate sale became a world leader. Bad breath became almost a fashion.

On the other hand, yeast was something merely to make bread with—until Fleischmann advertisements said otherwise.

Now we gain fair skins, robust health, cure ourselves of many of the common ills of mankind, and even look forward hopefully to Eternal Youth because of it.

For centuries women used makeshift hygienic pads. The subject itself was admittedly a forbidden one. A subject no one spoke about, much less wrote about, except in medical practice.

Then came Kotex. A sanitary pad. A product no woman had ever heard about. A product that admitted no definitely descriptive words in headlines to describe it.

Thus to learn what Kotex was intended for, the reader had to go deep into the text of the ads. Kotex headlines perforce had to be more or less indirect. No person could get the import of a Kotex ad without reading virtually every word of the ad itself.

That women did, every one who follows advertising knows. Over 80 per cent of the better class of women in America today employ Kotex. The makers of this product would be quick to answer whether or not advertising is read.

Thus Listerine, Fleischmann's Yeast and Kotex—at least three of the most notably successful products of the day—must be regarded as Simon Pure Advertising successes.

All had their basic selling stories, not in the headlines, but in the text of their ads. And readers had to read that text to be "sold." All stand as indisputable answers to the question, "Is Advertising Read?"

If people didn't read ads as carefully as news or feature matter, most of the successful concerns whose names are household words would be virtually unknown to the reading millions.

Men who have made money through advertising know how true this is.

reddened skin, a blanching occurs. If the disease be scarlet fever, scarlet fever antitoxin is also used in treatment and undoubtedly shortens the course of the disease and prevents complications. Serious reactions, however, at times follow the use of this serum.

**WE KNOW CHEVROLETS —YOU KNOW US!**

### Lawn Weeds, Moss Can be Eliminated

Weeds and moss in the lawn can be eliminated to considerable extent in the early spring by use of a number of chemical preparations which may be mixed at home. An effective weed formula is being used at Oregon State college, where it is applied to dandelions and other fleshy rooted plants by means of a pointed stick.

As described by A. L. Peck, head of the landscape architecture department, the material is made up as follows: Take one-quarter ounce of white arsenic and one-half gallon of soft water and boil well. Add another gallon of soft water and one-third ounce of caustic soda and boil again. This forms a stock solution used straight for killing individual weeds, but which may be diluted with four parts of water to sprinkle on gravel walks or drives to keep down weed growth.

Caretakers on the college campus put a long wire ball on tin can which holds the solution. They dip the point of a sharp soft wood stick in the solution and then plunge the stick down into the crown of the dandelion, which dies in two or three days. The solution is highly poisonous and is treated accordingly. The surplus being stored in glass under lock.

Moss may be eradicated by raking it well to remove the thick patches, and then spraying with a solution of ammonium sulphate dissolved at the rate of 22 ounces in a gallon of water. The most effective way is to apply during a period of clear weather, using a pressure sprayer, though fair results may be had by either sprinkling it on or even scattering the material in dry crystalline form.

Ammonium sulphate is a common commercial fertilizer available from most feed and seed dealers. It helps the grass while discouraging weed growth. If applied too strong it may cause some browning of the grass temporarily. It is not as satisfactory for use on clover lawns as some other fertilizers.

**IT STRIKES US**  
with considerable force that because puppies they are not SKY terriers or AIRredales, any more than a boy would be a STEP ladder if he had a STEP father.

However, it strikes us that if you will let Chevrolet specialists at this shop doctor your Chevrolet you'll thank us for the suggestion. We don't experiment with your Chevrolet at your expense. We go right to work and we know where we're headed because every Chevrolet is an open book to our skilled mechanics. Depend on this shop for guaranteed workmanship.
