

Sunset Loop Starts Sunday

Local Tossers Open Season Against Willamette

Hillsboro's entry in the Sunset league will open the 1935 baseball season at Willamette Sunday afternoon and will meet Aloha here the following Sunday in the first home game of the year. The locals have a promising collection of ball players and are expected to make a good showing during the season.

Pitching staff offered by Manager Bill Joos includes Conrad Stang, ace hurler from the 1934 squad, Austin Scorford who pitched Garibaldi to a championship last year and Jim Concannon, all-star pitcher from Portland high schools last year. In addition Joos has signed Henry Hunt, a Hillsboro man, and Ernest Dreher, a dark horse chucker from Nebraska.

Orin Darcy, former Tualatin Valley league catcher, and Art Hanna are scheduled to work behind the bat during the season. Dick Sutherland, former Hill star, will handle the first base assignment, while "Whitie" Matson, judged the best second baseman in Carl May's baseball school last year, and Earl Baker are battling it out for second base position. Rufus Fox, former Pacific university star, is working at shortstop and Harold Voelker of Blooming will hold down third base.

Four players are available for the outfield assignments. George Schmidt of Laurel is favored for center field, while Don Shattuck, one of the best fielders in the league last year, William Concannon and Manager Joos are slated for other positions.

Injury of Bob O'Brien last week was a severe blow to the team. He will probably be out of uniform during the entire season.

P. U. Girls Attend Conference

From left, they are Eleanor Sandford of near Hillsboro, Alice Weigel and Mildred Hatz of Milwaukie, delegates of Pacific university to biennial meeting of the western division of the national college women's conference last week-end at Hills college, Oakland, Cal. It is the first time Pacific has been represented since 1922 and Pacific

Grand Jury Indicts Six Persons Friday

(Continued from page one) indicted last week on a statutory charge, entered a plea of not guilty Tuesday.

James Wedding, Arie and James Flowers, all of Portland, and Samuel Sims of Tualatin entered pleas of not guilty to larceny indictments Wednesday. Trial dates were not set.

Action for cancellation of a contract and for restoration of an insurance policy was filed against the Mutual Life Insurance company of New York Wednesday by Dona Rae Howard. The plaintiff alleges that D. C. Howard, who died in January, 1935, attempted to surrender a \$5000 policy for its face value when he was incapable, due to his mental condition, to make a contract. She asks that the surrender contract be voided, that the policy be restored and that she be allowed her rights under the optional surrender provision of the policy.

Orders in the following circuit court cases were issued this week: W. D. Graham vs. Robert L. Finlayson et ux, dismissal; Mark T. Cox, executor, vs. Carl A. Hoffman et al, judgment and decree; Maxine Van Loo vs. William Van Loo, order; Hiram J. Hess vs. Fred Hester, default judgment; Liquidation Bank of Beaverton, complainant vs. Schuepbach assets, execution of deed to Harry R. Brown et ux; Bertha Kirkpatrick vs. Ralph A. Parker, default decree; Clara Murphy et al, default, decree; May L. Hull vs. Clarence C. Hull, default, decree; Rosa Greenfield vs. Charles F. Emerson et al, confirmation of sale; State Industrial Accident Commission vs. P. K. Minamoto, default judgment; D. Shaw vs. G. F. Shaw, order, publication of summons; S. E. Henderson et ux vs. A. L. Pelton et ux, dismissal; and Walter W. Howard vs. Mutual Life Insurance company of New York, dismissal.

Orders were also issued in the estates of Middleton S. Hanckel, Rosella Hathorn, William C. Hammon, Amos G. Bates, E. Quackenbush, Cora Eliza Lowry, Abraham Reichen, Rosanne Wood, Gjonjro Yamada, Agostino Casale and John O. Mikelson. Orders were issued in the guardianship of the Prickett minors and Elmer Burch.

Stanley Millikin of Ontario is visiting his sister, Mrs. James Say.

Quality Four-H Club Corn High

Four-H Club Boys Grow Fine Minnesota 13 Corn

Fifteen 4-H boys raised a total of eight tons of Minnesota 13 corn with germination tests of 90 to 100 per cent last year reports L. E. Francis, assistant county agent. Eighty-nine per cent is the Oregon standard for seed corn germination.

Seed was raised under the auspices of the Commercial National bank corn project and is being handled by the seed dealers of the county. Each year the boys entering this project are furnished with seed purchased from the boy who had the highest scoring field of corn the previous year.

Seeds this year will be secured from Irving Chase of Hillsboro whose field scored 933 out of a possible 1000 points and whose seed germinated 99 per cent, and from the Bierly Bros. whose field scored 920 and whose seed germinated 99.50 per cent.

The Bierly boys and Irving Chase all entered winning 25 ear exhibits in the Commercial National bank corn show and the Pacific International Land Product show.

Economist Answers Protest of Growers

(Continued from page one) ham explained. "If Oregon producers receive like price benefits it seems fair that they should make like contributions to surplus control."

Meeting last year was called at the request of a group of walnut growers who contended that Oregon growers should not observe the provisions of the walnut control code and should market their products independently. F. E. Rowell of Scholls presided. The group protested against paying their share of the 3 per cent surplus held back from the market to keep prices at a stable level.

Farm Union Plans 4-H Club Awards

(Continued from page one) be so labeled would increase the consumption of dairy products. The highway and school bills were also considered.

Farm Union locals planning to have booths at the county fair included Blooming, Gaston, Kansas City, Middleton, Laurel-Schools and Verboort.

Ernest Moe of McMinnville, president of the Yamhill county unit, and Herman Bernard of Carlton attended the meeting.

DON'T BLAME SPUDS FIRST FOR FATNESS, IS CAUTION

Are potatoes fattening? It depends upon how much rich gravy, butter or other fattening foods they are eaten with, says Miss Lucy Case, O. S. C., extension specialist in foods and nutrition.

Potatoes because of their starch content, are often erroneously considered as one of the most fattening foods, and are usually the first to be omitted from reducing diet. Scores of other foods may be more productive of plumpness, it seems.

The fattening quality of any food depends on the number of heat units, called calories, that it contains, Miss Case explains. All foods have calories, more and some gram, and starch, which means that fatty foods are more than twice as fattening as starchy foods, such as potatoes. Starchy vegetables, of course, contain more calories than green and succulent vegetables, and the latter would consequently be used more generously in a reducing diet.

Comparing the calorie content of potatoes with some of the foods often substituted for them by those fearful of becoming overweight, Miss Case points out that it takes a five-ounce potato to make 100 calories, while it takes only one-ounce shredded wheat biscuit, two graham crackers, two ounces of hamburger steak, one-fourth cup (before cooking) of macaroni, or one-third cup or 3 1/2 ounces canned corn. Rich gravy, butter cream, mayonnaise dressing or other fats

Office for Housing Plan Opens Monday

(Continued from page one) Details regarding these items may be obtained at local banks.

Applicants are required to have fire and hazard insurance prepaid for 37 months and all taxes paid. In addition costs of appraisals and legal fees and the initial service charge must be paid.

Blue prints and specifications of the proposed improvements are to accompany the applications. These will be approved for the protection of the borrower. The loans are not intended for distressed mortgagors but for people whose income permits improvements or new homes. Secarce said.

Home Use of Raw Material Gaining

With sheep shearing time near at hand, many Oregon homemakers are planning on obtaining a fresh supply of wool for making quilts, comforters, mattresses or for spinning and weaving or knitting.

Home use of raw wool has, during the past two or three years, become almost as important an activity in the Oregon farm home as it was in pioneer days. Largely through a project conducted by members of the Oregon State college home economics extension staff, women of many counties throughout the state are learning to clean and scour the wool at home, to dye it with natural dyes collected in the woods and on the farm, and to card and spin it for use in weaving, knitting, making hooked rugs and for many other purposes.

Different types of wool are suitable for different purposes, according to Mrs. Azalea Sager, extension specialist in clothing and textiles at O. S. C. Fine wool similar to Marino and Rambouillet or medium wool such as Hampshire, Shropshire or crossbred is best for bedding and mattresses, she says. For craft wool, to be used in spinning or in making of rugs, medium wool is best. Lincoln wool can be used for this, but there is a little more difficulty in carding the longer fiber.

Contrary to general opinion, a short length staple is more desirable than a long staple, Mrs. Sager says. Wool that is coarse and contains a high percentage of kempy or medulated fibers is undesirable, because these fibers are stiff and will come through practically by any material that is used for covering wool hats.

In calculating the amount of raw wool needed for any purpose, it can be assumed, Mrs. Sager says, that it will be reduced 45 to 65 per cent in weight by the scouring and carding. One pound of washed and carded wool is needed for a quilt or spread; three pounds for a medium sized comforter, and from 20 to 30 pounds for a mattress. For hooking a rug with hand-rolled wool, three pounds of scoured wool will be sufficient for a rug three by four feet.

MEASLES, MUMPS AND WHOOPING COUGH

It is high time that the public realizes the danger of the all too common infections of childhood. We frequently hear the remark that children may as well have measles, mumps and whooping cough while they are young and later they will catch these diseases anyway. It is true that modern conditions of living and traveling are such that these diseases circulate continuously, reaching even the smallest communities every few years. Eventually, nearly everyone is attacked, but early childhood instead of the most favorable time is actually the worst period

added to any of these foods greatly increase the calorie content, however, Miss Case adds.

At meal time, a medium sized potato, seasoned with one-half tablespoon of butter contains 130 calories, but a single piece of apple pie means 305 calories and if eaten with half a cup of ice cream or one-fourth cup of whipped cream, 200 more calories are added. A six-ounce serving of ham contains 400 calories, and a waffle with two tablespoons of butter and one-fourth cup of syrup on it contains 730 of these fat producing units.

The between-meals nibbler gets 105 calories from three gumpdrops, 110 from 10 salted almonds, 100 from 1 1/2 cups of un buttered popcorn, 100 from two caramels, 250 from a plain chocolate bar, 100 from a one-inch cube of fudge, 195 from a doughnut, 465 from a chicken sandwich and 350 to 500 from an ice-cream sundae.
