County Wheat Men Back Control Plan (Continued from page one) tract. It was merely an expression of his thought that some kind of an adjustment program should be continued.

Proposed new wheat contract, which is as yet only tentative, will apparently cover the wheat crops of 1936, 1937, 1938, and 1939. It will probably be patterned after the contract that is now in force but which expires with the 1935 crop.

Check up for compliance for 1935 will start locally some time in the next two weeks and will be handled very much the same as last year. With experience gained last year the officials of the local wheat control association anticipate that compliance work will be completed much more quickly than a year ago.

There's nothing wrong with a columnist because he usually says things on the spur of the moment. We say much in few words when we say that if you're good to your car it'll be good to you. An occasional tuning up, attention to any needed repairs and periodic checking will keep your Chevrolet in its most efficient condition at the lowest average cost. Permitting small repairs to develop into major operations through neglect is thoughtless waste of money. Your gas and oil dollars will go further when your motor is in tune.
