WHEN LIVES LOST YOUR PEP? ARE AT STAKE

You need the same tire protection that race drivers demand

KELLY PETILLO, ON MAY 30, WON THE 500-MILE Indianapolis Race on Firestone Tires, breaking the track record and driving the entire distance at a rate of 106.240 miles per hour.

This record is an astounding demonstration of tire efficiency. To go 500 miles in less than five hours on this rough and bumpy 26-year-old brick track demonstrates the strength and blowout protection that Firestone builds into their Gum-Dipped Tires. AB JENKINS ALSO RECENTLY DEMONSTRATED THE

stamina, efficiency, and blowout protection built into Firestone Gum-Dipped Tires. He drove his 5000 pound car over the hot salt beds at Lake Bonneville, Utah, 3000 miles in 231/2 hours. This was an average speed of 127.2 miles per hour, and although temperatures were as high as 120°, he had no blowouts or tire trouble of any kind. These records are made possible by special construction features

built into Firestone Gum-Dipped Tires. Take no chances—protect your life and the lives of others by letting us equip your car with Firestone Tires.

Before you buy new tires ask yourself these three questions

protection against skidding?" 2-"Are they built to give me the greatest blowout protection?"

greatest traction and

3-"Without sacrificing these two important safety features will they give me longer mileage, thus making them the most economical tires I can buy?"

Answer No. 1 -University tests 1-"Will the tread give me the show Firestone Tires stop your car 15% quicker than best tires. Answer No. 2 -Unequaled per-

formance records prove that Gum-Dipping gives the greatest blowout Answer No. 3 -Car owners report unequaled mileage records of the longer wear and greater economy of Firestone Tires.
