Local Industries - - -

ARE THE BALANCE WHEELS WHICH SERVE TO HOLD PRICES WITHIN BOUNDS

It is a noticeable fact that in localities where there is no locally manufactured product to hold a commodity down in price, those shipping in from outside points take advantage of the situation and almost always boost the price.

It, therefore, is only good business on your part to patronize your local industries. Especially when the quality is equal and your local people will meet any temporarily lowered price by an outside concern.
