Small Ad Sells Seven Horses

"A lot of people sure must read the Argus classified ads." This was the comment of an advertiser who was almost swamped with responses to the 36-cent advertisement he inserted in the Argus, seeking to sell or trade seven work horses.

People started coming to his farm the day after the paper came out and by the first of the week every animal was gone. The advertiser declared that he could have sold 20 horses if he had had them.

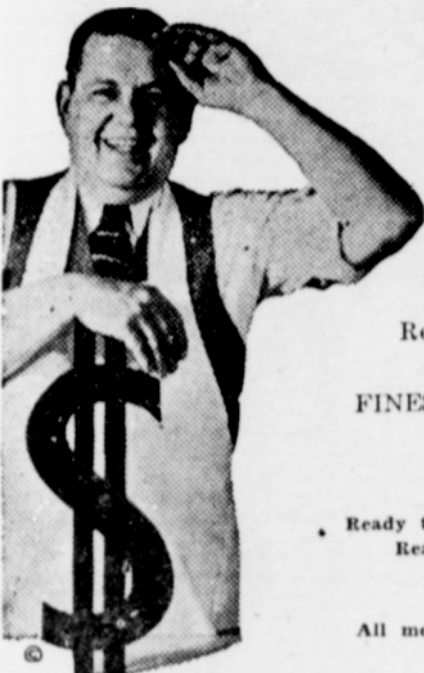

The following ad did the job for this man and similar advertisements may bring similar results to you. Put your notices to buy, sell or trade in Washington county's biggest market place, where

big results are realized at small cost.
