CHAPTER I—As Alan Garth, prospector, is preparing to leave for his mining claim in the Far North, a plane lands at the airways emergency station. In it are Eurton Ramill, millionaire mining magnate, his daughter, Lilith, and Vivian Huxby, pilot and mining engineer. Believing him to be only an ignorant prospector, the men offer to make an air trip to Garth's claim, although they refer to the platinum-bearing ore as nearly "worthles." Lilith Ramill, product of the jazz age, plainly shows her contempt for Garth.

"You see I have you sized up right," Garth replied. "You're neither a hothead nor a fool. All your moves are based upon cold-blooded calculation. In this case, you'll calculate these factors: If you kill me, you will most certainly starve to death, unless you first sink in the slime of muskeg bog. The only other alternative is for you to stay here and freeze at the first onset of winter. Platinum is of no more use to a dead man than is gold."

The mining engineer stood signal. Garth went on:

The father looked at Garth with sible the plane may drift ashore."

"A hundred to one chance it will not, sir. We'll go out on mosshide, if at all. I've decided not to make it alone. A trip through the muskegs may lead you to realize that even lone woodsy prospectors should be entitled to the fruits of their discoveries."

The girl's smoldering rage flared out at him: "You scoundre!! Decoy us into this beastly hole, and then strung about six miles of new lines, both poles and wire, through other Washington county communities furnishing service to number of the muskegs of the new enterprise, Murton said.

The mining engineer stood silent. Garth went on:

"We are speaking of what concerns you most. So I'll not mention the no less certain death of your partner and the lady to whom you are engaged. The other side of my argument is that, if I am not murdered, I can guide you back to the Mackenzie. What if you then had another chance to steal my claim? Wouldn't that be a big inducement?"

"Lower your pistol, Vivian," Ramill ordered. "Garth has us outplayed. He holds the aces. Look at the plane. It's heading straight down the lake towards the falls. There's no chance for it, unless the wind veers."

Garth nodded. "This breeze will keep on blowing down off the glacier until the first autumn blizzard. It's a shame, sir, to crack up so fine a plane. But you would have it."
