"I put TERRAPLANE first because I put Safety First"

"Go ahead, kids . . that car's aot BRAKES!"

No one needs to be reminded that safe driving in winter, more than at any other season, calls for a car that is safe.

Then why not start this new year with the "safest car on today's highways?" Terraplane-with more new and important safety features than any other low priced automobile ever had!

Bring Safety up to Date!

For safer riding, safer steering, safer stopping, Terraplane brings you Radial Safety Control (patent applied for). Here is a revolutionary principle of front axle and spring design which new owners from coast to coast are hailing as the greatest safety feature in many years.

None but the best brakes are good enough. And no other low priced car but Terraplane meets that demand with Duo-Automatic Hydraulic Brakes (patent applied for). Latest and best hydraulics with a separate safety braking system that takes hold automatically if ever needed.

For added safety on the highwaygreater steadiness on curves-two more

1936 improvements: Tru-Line Steering and the Rhythmic Ride.

Safer Bodies! Safer Chassis!

The world's first safety engineered chassis is now combined with America's first bodies all of steel, and seamless roof of solid steel.

There is extra safety, too, in Terraplane's record-breaking performance, to take you out of traffic "tight spots." And in the Electric Hand, an optional extra, for easier gear shifting and safer

Drive safely in 1936-in a car that you know to be safe. Drive a new Terraplane.

and up for De Luxe models, f. o. b. Detroit. Standard group of accessories extra.
