Poultry Pathologist Beaverton Speaker

Dr. W. T. Johnson, poultry pathologist of the Oregon State college, and recognized international authority on poultry diseases, will give an illustrated lecture at the monthly poultry meeting which will be held in the Beaverton high school Tuesday at 8 p. m., according to L. E. Francis, assistant county agent.

The brooding season is now well under way and, among the many problems connected with poultry raising, disease control is probably one of the most important, states Francis.

Knowledge of the proper measures to prevent outbreaks of disease in a flock is of prime importance. Next to good preventive measures is the ability to recognize the more common diseases in their earlier stages and to be able to apply the proper control. In his discussion of poultry diseases Dr. Johnson will show several slides picturing the more readily recognized symptoms of common poultry diseases. This discussion should be of real value to poultrymen because of its importance to the poultry industry and its timeliness.
