Pin-ball Machines Ruled Out Locally

New Conservation Plans Announced

(Continued from page 1) was signed, in a majority, by women, while in the opposing set, men almost exclusively signed the petitions. Rumors were flying among machine operators over the county Saturday night, that the county officials were moving to prohibit the games in the county with the exception of the machines using 10 balls, and which are not automatic in the pay-off.

However, confirmation of this information could not be obtained from local officials, except that G. Russell Morgan, district attorney, declared that he would move to clean-up all punch boards, said to be in common use in violation of the law. At present the supreme court has been asked to rule on a conviction taken in one of the southern counties against operators of the one-ball machine games in which the jury held that the machines were operated on chance and not on skill.

Should the supreme court hold that this type of machine is a device of chance, the games will be ruled out all over Oregon and give local county authorities legal grounds on which to take action. At the present time, the Oregon statutes hold that machines in which there is an element of skill are not gambling devices and consequently cannot be seized and prosecuted.

April Fool Weather Brings Winter Back (Continued from page 1) noon and had virtually disappeared by night. Weather reports for the week disclosed five of the seven days with freezing temperatures, with the highest maximum temperature for the period 34 degrees above zero last Thursday and the lowest maximum 31 recorded Tuesday. The lowest temperature for the week was Wednesday morning when the reading taken by A. W. Moore of the biological survey was 27 degrees above. The survey records show an inch of snow on Sunday and a half-inch for Saturday. Moisture has been recorded five days out of the seven.

Continued inclement weather has caused considerable grumbling among businessmen, particularly the operators of wayside filling stations, confectionery stores and dry goods merchants. Seasonal sales are held back.

Farmers still are delaying the beginning of farm operations, although considerable early plowing was accomplished in February.
