Residents Protest Proposed District

ty would still be a part of the district and still have its share of the expenses to bear.

Since the beginning of the utility district fight, the movement, begun by a Beaverton Taxpayer's league, has been spreading rapidly among property owners with the result that a bitter fight is expected this fall when the proposal comes to a vote.

In other counties, the same fight is being waged to prevent the establishment of the district. The movement has been underway among Clatsop county farmers for some time, according to reports from there.

SALEM—The proposed Northwest Oregon Bonneville People's Utility District does not hold forth any immediate prospect of a reduction in electric rates for consumers within the district in the opinion of the Oregon Hydro-electric commission.

The report of the commission makes no recommendation for or against the proposed project, but is confined entirely to a statement of facts in connection with the project as revealed in studies made by engineers of the department.

The proposed district would include most of Clackamas, Clatsop, Columbia, Lincoln, Polk, Washington and Yamhill counties, embracing an area of 2427 square miles and a population of 145,984.

"Creation of the district does not, of itself, embark the people on a program of ownership and opera-

Man's Faithful Pal Keeps Vigil at Jail

tongue swiped at an exposed hand, but there was no response. The fingers failed to seize her muzzle in the game they always played. Fear laid heavily on her heart and there under the stars they found her on guard, making frantic and tumultuous protest to each passing car as it whirred and passed.

When the officers attempted to raise the master, she attacked, valiantly, and with a blind courage. Thus "Lady" went to jail Saturday night, to sit in lonely vigil while her master slumbered drunkenly on a cell cot, and so she kept her watch through the long Sunday and the night which followed, to receive her reward Monday morning when a word from the master dispelled the fear and reminded her that again all was well with the world.

The final chapter was written in justice George Thyn's court in Beaverton when Costa, counted his few dollars and paid for his spread. "A couple drinks of beer and a few swigs of port wine," he explained. The combination, the justice remarked, must make a potent if not lethal experiment.

Built Like an Automobile

You have never seen a mower like this

It is Really New and Different

McCormick-Deering No. 7 Enclosed-Gear Mower

WE are anxious to have all of our friends see the New McCormick-Deering No. 7 Enclosed-Gear Mower. We think it is one of the finest pieces of farm equipment we have ever sold!

Everybody who has seen it says they never had any idea that a mower could be built as this one is.

For example: The entire operating mechanism, including drive gears, differential, and counter-shafts, is assembled compactly in an oil-tight gear housing and runs in a bath of oil. There are four high-grade roller bearings. Operation is so smooth and noiseless that you can scarcely hear the light hum of the sickle!

Special oil seals at the ends of the main axle and fly-wheel shaft, and the oil-tight gear box prevent leakage and protect all working parts against the entrance of dirt and other abrasive materials. Floating action of cutter bar provides ample play without disturbing knife registration.

This mower has just one enclosed gear runs in a bath of oil—a full gallon. The cover B, makes the gear case dust-proof and oil-tight. Clutch A, "brown in and out by lever, A."
