Test Absorbers

Shock absorbers should be examined occasionally by someone who is familiar with their service requirements, according to the Oregon State Motor association. While shock absorbers are constructed so as to cause little if any real trends as to cause little if any real trouble, the riding qualities of a car can be improved if they are correctly serviced and adjusted.

AND LOOK AT THE PRICE

· Here's the tire that proves you don't need to pay fancy prices in order to

get high-priced tire features. For Goodrich Cavalier Tires-even though they are low in cost-are AA quality, "double-cured" and built with many other features you expect to find only in tires that cost more. And because they're "doublecured," Cavaliers are tough all the way through.

That's why they give you more mileage and stand up under hard service. Yet, just think, they cost no more than ordinary "singlecured" tires.

IN A FORD V-8 YOU CAN DEPEND ON

Office Phone 861

VER two and a half million owners have proved the economy of the Ford V-8 engine since 1932. And the 1936 Ford V-8 is the most economical car to run that Ford has built during 33 years of building economical cars.

The explanation is simple. A dual down-draft carburetor splits the fuel needed by a "4" into eight small charges. Special crankcase ventilation assures better year-round oil efficiency, reducing wear and repair. Aluminum cylinder heads practically eliminate carbon and allow premium performance on regular-priced

gasoline.
