World renown

...and a \$25,000,000 Income for Oregon

IN the world's markets "Made in Oregon" is a guarantee of high quality in cheese and butter. Oregon continues to win more high dairy production records than any other state—bringing a price premium to Oregon dairymen, favorable publicity to the state, and jobs for thousands of dairy industry employees.

Oregon has more than 8000 dairy farms. Last year 16,000,000 pounds of cheese and nearly 30,000,000 pounds of butter were made in this state. A million and a half gallons of ice cream added to the wealth of Oregon's dairy products—a wealth reflected in bigger payrolls and more employees for the many businesses that profit from Oregon's \$25,000,000 dairy income.

(Figures supplied by Portland Chamber of Commerce)

Dairying started in Oregon in the early 50's when pioneer settlers drove herds of cattle nearly 2000 miles overland from the middle west. For over 70 years The First National Bank has taken an active interest in the growth and development of this pioneer industry. Now 260,000 milk cows graze on Oregon dairy farms—a dairy stock has been developed that brings world renown for high quality products. In 46 cooperative associations progressive Oregon farmers continue to work together for the improvement of dairy conditions. Today The First National Bank of Portland, both in Portland and through its branches in the dairy districts, continues to help the dairy farmer and dairy product manufacturer with the financing of this great Oregon industry.
