

### Employees Must Now Register

With registration blanks for employees, who come under the new social security law governing old age insurance, all distributed in Hillsboro blanks for employees were being mailed Tuesday and Wednesday of this week from the local postoffice.

The employers' blanks were to have been returned to the postoffice not later than November 21. Employees' blanks must be returned to the post office not later than Saturday, December 5.

Persons may return these blanks, properly filled in, directly to the post office or place them in an envelope addressed to the postmaster at Hillsboro and give them to a mail box. Postage for the return of the blanks is not necessary.

In a detailed story in other columns of the Argus will be found an explanation of the new law. However, much of the law still remains to be interpreted or held to have to be clarified by further acts of congress, and changes are expected which will make the law easier to administer.

### City Council Scans New Sewer Rules

(Continued from page 1)

at the Y designated by the sewer engineer. In the new district every person is required to make his own connection to the sewer line. The sewer line is to be constructed by the sewer inspector. This point shall not be more than 15 feet from the property line of the applicant, and it shall be the responsibility of the city to construct a connection providing that the city shall not be required to carry such construction more than 200 feet from the present sewer line.

Lateral must be constructed of vitrified clay sewer pipe or concrete sewer pipe, and all work must be done in accordance with the approved methods set forth in the ordinance. The ordinance covers the entire field of construction in an attempt to obtain properly laid and constructed sewer lines which will not give trouble at any future time.

Under the terms of the ordinance, it shall be unlawful for any person to make an opening in any sanitary sewer or connect any private drain or sewer therewith without first obtaining a license to do so from the sewer inspector's license, which will cost \$5 a year.

These licenses can be obtained by applying to the sewer inspector in proper form. This form must show the full qualifications of the applicant and include a certificate signed by two responsible plumbers to the effect that the applicant is known to them as reliable person and skilled in the business of laying and connecting sewers. Each applicant also is required to file a surety bond in the sum of \$1000. The sewer inspector shall investigate the application, and if satisfied can issue a contractor's license.

The ordinance does not prohibit the owner or a member of his immediate family from making an installation without taking out a contractor's license. However, the owner, or member of his family, must appear before the inspector and answer such questions as will show his qualifications to perform the work. A city permit must be obtained and the work done in accordance with the ordinance and under the inspection and approval of the sewer inspector. The work also must be done without pay.

All work by contractors must be completed within a reasonable time and the sewer inspector is given power, should the work be unduly delayed, to fill in any excavation and render the place safe. The contractor shall be assessed, in such case, to the property owner. Another provision deals with failure to do the work in the manner set up under the ordinance and allows the sewer inspector to serve notice on the property owner, thereafter completing the work under city direction and assessing cost to the property.

Fine of not less than \$10 nor more than \$500 is provided for violations of the ordinance, or confinement to the city jail of not less than five days nor more than six months.

While residents of the old sewer district must have sewer connections made immediately, if not already installed, patrons of the new district will be allowed 60 days grace after the acceptance of the new sewer lines by the city, in which to complete connections.

At present the new sewer lines are under test and will not be accepted until such tests have been completed, according to George McGee, city manager. The old sewer district already is connected to the new disposal plant and the plant is in full operation.
