What's time worth today?

The only thing that applies to all farms and all farmers exactly alike is time. Its use is the measure of profits.

"Caterpillar" Track-Type Tractors are the tools with which to fully utilize time.

Because of sure gripping traction, "Caterpillar" Tractors start to work earlier in the season and continue later. They get the work done at exactly the right season and thereby increase production. They work in almost any kind of soil and thus save the time lost by other forms of power in negotiating the tough spots.

You'll get in more hours of work with a "Caterpillar" and accomplish more each hour.
