A new kind of tire that completely eliminates

# the dangerous Skidding swerve

NOW ... WITH THE GENERAL DUAL 10 YOU CAN STOP YOUR CAR STRAIGHT IN ITS TRACKS ON ANY ROAD, WET OR DRY

· Everyone who drives a car has skidded. You may not have had a bad accident but you have experienced that hopeless, helpless feeling of a car

HERE'S WHAT HAPPENS WHEN YOU APPLY THE BRAKES! Magic ribbons of rubber squirm into a squeegee-like action—wipe the surface clean and grip in every direction provide constant, sure traction on any road, wet or dry.

sliding out from under you. Now for the first time that dangerous skidding swerve has been completely eliminated. You can now stop your car

straight in its tracks on any road, wet or dry. The new General Dual 10 tread is so different from conventional tires that you can't believe your eyes. It consists of magic ribbons of rubber that squirm into a squeegee action when the brakes are applied.

The whole tread is so flexible that there is minimum resistance to the road or obstacles. This, with General's patented low pressure construction, makes an easy riding, cool running and long wearing tire. No cupping. Wear is always slow and even.

Come in today and drive a car equipped with Dual 10s. After you have seen for yourself what these tires will do we believe you will be afraid to drive any car without them.
