4 MILES IN 5 ARE STOP-AND-GO

It's the costliest kind of driving you do

STARTING UP after just one stop can waste enough gasoline to take you 1/3 of a mile.

To cut down the high cost of stop-and-go driving around town, Shell engineers have developed a way to "balance" gasoline.

By this balancing process the entire chemical structure of gasoline is rearranged. Actually it is made "digestible" for your motor, just as food is made digestible for you by cooking.

When starting, shifting, accelerating—at all times—your motor gets the full benefit of Super-Shell's high energy content.

"Motor-digestible" is the best way to describe this gasoline.

Try a tankful of Super-Shell next time you need gas. There's a Shell dealer near your home.
